# **DENTAL EXTERNS**

The entire Senior Class in Dentistry of the Loyola University School of Dentistry, New Orleans, Louisiana, serve for specific periods as Externs in Dentistry in Charity Hospital—Assignments for period 7/1/57 to 6/30/58 were as follows:

June 23, 1957 - July 13, 1957 Roland A. Caire Sam S. Vinci Franklyn E. Copeland

July 14, 1957 - August 3, 1957 Martin C. Bonacorso Doyle F. Phillippe John F. Day

August 4, 1957 - August 24, 1957
Jack L. Ratley
Roland Turner
Richard Donohue
Roland A. Caire

August 25, 1957 - September 14, 1957 Lloyd M. Magruder, Jr. Norman Zaffater Donald J. Perrere

# DENTAL EXTERNS—(Continued)

September 15, 1957 - October 5, 1957 Hector Oliveiro Alvaro J. Marin Carlos F. Mendoza

October 6, 1957 - October 26, 1957 Carroll L. Wood George N. Newton

October 23, 1957 - October 26, 1957 Carlos Maal

October 27, 1957 - November 16, 1957 Wheeler M. Tunstall Frank S. Sciaro Raphael deBoisblanc

November 17, 1957 - December 7, 1957 Louis Gilberti James T. Clynes Robert A. Lefeve

December 8, 1957 - December 28, 1957 Michael Maal

December 15, 1957 - December 17, 1957 Carlos Maal

December 18, 1957 - December 31, 1957 Carrol Ancelet

December 22, 1957 - December 28, 1957 F. Hanley

December 29, 1957 - January 18, 1958 James A. Andrews Dominic Barrese Robert J. Clark

January 19, 1958 - February 8, 1958 Walter E. Tisdale Fred Tegtmeier James Brockwell

February 9, 1958 - March 1, 1958 Carlton Haugen Clyde Giordano Ernesto Calvo

March 2, 1958 - March 22, 1958 Olin Desonier Charles Sicard Ernest Mittelbronn

March 23, 1958 - April 12, 1958 Loys L. Huckabay Cecil R. Lloyd William M. Hardy

# DENTAL EXTERNS—(Continued)

April 13, 1958 - May 3, 1958 Meredith Burch Arlen Hanchey Richard Lesneski

May 4, 1958 - May 17, 1958 Jerry C. Johnston Edward Simon

May 18, 1958 - June 7, 1958 Gordon J. Mills James Camel Alcest L. Babin

June 8, 1958 - June 28, 1958 Harold G. Edwards Frank J. DePaula Reuben A. Crowe

June 29, 1958 - July 19, 1958 S. G. Utz Wilbur Schnauder Frank L. Taulli

## JOINT REPORT OF THE VICE-PRESIDENT AND THE DIRECTOR

June 30, 1958

Honorable Earl K. Long Governor of the State of Louisiana Baton Rouge, Louisiana

The Vice-President of the Board of Administrators and the Director of the Charity Hospital of Louisiana at New Orleans, submit the following report of the activities of the hospital for the fiscal year, July 1, 1957 to June 30, 1958.

Cost of Operation—As compared with the previous year, cost of operation; that is, ordinary recurring expenses increased \$752,463.59 or 6.52% over the previous year from \$11,539,348.76 to \$12,291,812.35. In addition to our regular state appropriation, we received an extra appropriation to cover the prior year's deficiency. Of the total cost of operation, 69.59% represents salaries. Food costs dropped 5.19%, while drugs and surgical supplies increased 2.21%. During the fiscal year we remitted \$316,911.18, representing collections for medical services rendered ineligible patients and other non-operating income.

Personnel—Among the new personnel policies instituted during the year was the new orientation check-list to aid supervisors when interviewing new employees and an inquiry into the status of employees serving their working-test periods. This inquiry is designed to weed out sub-standard employees. The work of employees serving under provisional or probational appointments was carefully evaluated and those who were not doing satisfactory work were removed from their positions. As a result of a revision in the Civil Service pay plan, salary adjustments were made for 2,995 employees.

Purchasing—All contracts and orders were awarded to the lowest responsible bidders on a competitive basis. The services of the various testing laboratories were utilized to assure compliance with provisions of state laws with regards to specifications. Surplus commodities received from the Food Distributing Section of the State Department of Education amounted to \$24,618.49, a reduction of \$19,107.00 below the value of those received the previous year.

Maintenance Physical Plant—Routine maintenance to keep the hospital buildings and equipment in good condition throughout the year was performed by the Hospital's Maintenance crew.

During the year, alteration to the seventh and eighth floors—Radiology Department, replacement of window screens and boiler replacement had started. This work is estimated to be completed late in 1959.

Patient Services—During the fiscal year, 71,417 patients were admitted to the hospital as compared with 75,052, the previous year, a decrease of 3,635. The daily average number of patients in the hospital equaled 2,174. Of the total admissions, 46,343 or 64.89% were from the New Orleans Metropolitan Area (Orleans, Jefferson and St. Bernard Parishes) and 23,718 from all other parishes of the state. One thousand three hundred and fifty six (1,356) admissions were from other states and foreign countries and were admitted as emergency patients.

Outpatient Visits—707,922 patients were given medical treatment in the clinics and emergency rooms as compared with 695,957 the previous fiscal year, an increase of 11,965.

The established policy at the hospital is to limit admissions to those patients who are in need of medical and surgical attention and who are unable to pay for these services. The only exception to this policy being those emergency cases who seek medical and surgical attention who, because of their condition, must have immediate attention. However, if found ineligible, they are billed for the services rendered. Patients who are able to pay are discouraged for the following reasons:

1. The medical profession contributes many hours of their time without charge and at a considerable sacrifice in order to render service to the indigent sick. It is not the policy of the hospital to compete with them in their profession, nor do we want to compete with private hospitals. It costs the hospital a considerable amount of money to administer to pay patients even though they pay for their services. Also, ineligible patients use many facilities that are badly needed for eligible patients.

During the year, the hospital collected \$245,389.19 for services rendered ineligible patients. This amount is transferred to the State Central Fund. The interdepartmental committee composed of three or more members of the Board, of which Mrs. Ila H. Slater was appointed chairman after extensive study and evaluation recommended an intake department to screen all patients as to their eligibility. New rules were established and the new department was being established just as the fiscal year ended. This will be a big savings to the State and at the same time relieve the work load for the doctors of Charity Hospital.

In conclusion, appreciation is expressed to the Sisters of Charity, who throughout the year have continued to work for the best interest of the hospital and the patients within. To the members of the visiting staff of doctors and to our residents and interns, we express deep appreciation for their constant devotion to duty and their willingness to assume the extra burdens placed upon them during the year.

The department heads and all personnel are to be complimented for their services which were rendered so efficiently during the year.

Last, but not least, we wish to express our gratitude to the individual members of the Board of Administrators for their time and efforts given so generously during the year in order to enable the hospital to function efficiently and economically during this fiscal year.

Respectfully submitted,

Don L. Peterson, D.D.S. Vice-President, Board of Administration

Leo J. Kerne, M.D. Director

#### CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

#### Comments on Operations Fiscal Year July 1, 1957 to June 30, 1958

We present herewith the Financial Report accounting for the revenues and expenditures of all funds for the fiscal year July 1, 1957 to June 30, 1958.

In the following general comments, there is presented comparisons in the cost of operation of the hospital during the current fiscal year as compared with the previous year and other statistical information.

The Cost of Operation increased \$752,463.59, or 6.52%, over the previous year from \$11,539,348.76 to \$12,291,812.35.

We ended the past fiscal year without a deficit possibly due to the fact that the entire hospital made an all out effort to be very conservative in the operation of all departments. The deficit of \$99,894.32 from the fiscal year ending June 30, 1957 was offset this fiscal year by Legislative Appropriation.

#### Comparative Statement-Means of Financing

	1957-1958	1956-1957	Increase

The number of employees on the payroll as of June 30, 1958 was 3,181, or a reduction of 80 employees over the previous fiscal year. During the year, 1,260 were employed and 1,341 were released, accounting for a labor turnover of 32.88%, compared to a 52.06% turnover the previous year. Resident doctors, internes and student nurses are not considered as employees and are excluded from the above figure.

The Personal Service Cost increased \$759,803.35 over the previous fiscal year. The direct nursing personnel cost increased \$288,144.02, or 37.92% of this total, whereas, during the last fiscal year, the direct nursing personnel cost amounted for over 50% of the increase.

This year, employee accidents accounted for 857 man-days.

A comparative analysis of employees on the payroll at the end of each fiscal year is as follows:

	June 1957	30th 1958	Increase
Registered Nurses Practical Nurses Nurse Aides	232	321 271 728	12* 39 97*
All Other Personnel	1,390	1,320 1,861	70* 10*
	3,261	3,181	80

<sup>\*</sup>Decrease

The cost of food consumed decreased \$55,766.87 or 5.19%. First, the decrease could be attributed to the reduction in the number of patients admitted during the fiscal year; and, second, all foods purchased had to comply to the Agriculture Marketing Service, and only meat and poultry that had the Certificate of Inspection were purchased by the Hospital. All canned vegetables had to bear the Federal Inspection Certificate both as to grade and quality. This was a saving to the hospital as we were able to buy better food and eliminate a lot of waste.

During the year we received from the U.S. Surplus Commodities Corporation food evaluated at the prevailing market prices at time of receipt amounting to \$23,615.89 as compared to \$43,725.49 received the previous year. These donations also contributed toward lowering the cost of operation.

The increase in the cost of Drugs and Surgical Supplies did not show a substantial increase this year. From the preceding analysis, it will be noted the increase was \$3,571.98 or 2.21% as compared to the \$74,951.23 (12.27%) increase of last year.

Repairs and maintenance expenses increased \$12,559.03 or 9.69%. Other operating expenses decreased \$18,119.26 or 2.13%.

<sup>\*</sup>Decrease

Revenue from Federal and Other Grants decreased \$134,328.26. The major decrease has been in revenue from Polio Patients. The Salk vaccine has caused the NFIP revenue to decrease \$124,543.70.

Premature Infant Program has only one more year to run. Our contract this year was for \$25,000.00, a decrease of \$14,288.60 under last year.

#### Insurance

All hospital property has adequate insurance coverage. All employees, including professional personnel, are covered by Workmen's Compensation Insurance.

#### General

Expenditures during the fiscal year were made and accounted for in accordance with the provisions of the State Budget Act.

All obligations incurred and due by the Hospital as of June 30, 1958 are current and accounted for and liabilities set up therefor.

Following the hospital's customary practices, we have taken advantage of all allowable cash discounts in accordance with the terms of purchase contracts. Cash discounts earned during the year amounted to \$40,101.92. During the year we paid \$52,227.56 in State Sales Tax.

#### Visitors Food Service

The operation of the cafeteria is financed by a separate Legislative Appropriation of \$7,500.00 as a revolving fund, subject to be returned to the State General Fund should the operation of the Food Service be discontinued.

Contracts have been entered into with a number of soft drink dealers and cigarette vending companies to install vending machines in the hospital as an accommodation to the patients and employees for which the hospital receives a commission on sales.

Profits earned during the fiscal year as compared with the previous year were as follows:

1957-1958 Commissions earned on Vending Machine Sales\$28,143.45 Deduct Loss in Cafeteria Operation	1956-1957 \$29,966.93 7,353.80
\$17,083.33	\$21,613.13

Profits in the Food Store are approximately \$5,000.00 less than last year which can be attributed to the extensive renovation of the Food Store during the past fiscal year. As provided by law, the net profits earned are subject to be transferred to the State Treasurer.

### Trust Funds | Land Hall Control of the Control of t

#### Bond Liquidation Fund

During the year, \$350,000.00 of Bond Obligations were retired and the total interest on the bonded indebtedness amounting to \$165,627.00 was paid.

As authorized by the Board of Administrators, \$281,040.54 was transferred to the Operating Funds.

During the year the maximum amount of the Bond Liquidation Fund was invested in ninety day U. S. Treasury Bills. Interest earned during the year amounted to \$5,325.28.

The balance of \$444,598.75 remaining as of June 30, 1958 provides a reserve for the retirement of the bonded indebtedness and the accrued interest on the bond obligations, due and payable, as follows, viz:

#### Retirement of Bonds:

<sup>\*</sup>RED Figures

The chart opposite presents operating statistics by months for the fiscal year July 1, 1957, to June 30, 1958. The chart shows at a glance how more efficiently the hospital was operated after the economy drive in April. Operating Expenses reached a peak during the Month of March and took a very large drop after the drive got under way.

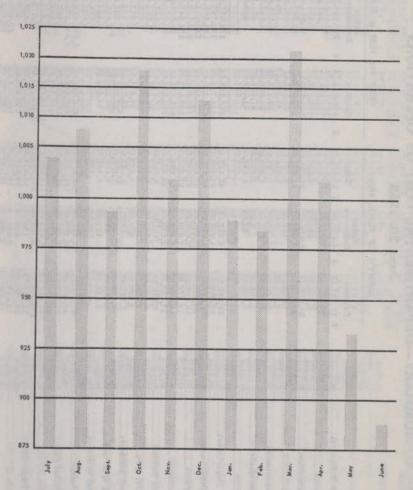

Expenses continued dropping until June when it reached its lowest level during the fiscal year.

After starting the new fiscal year, it should reach a level by the third month and gradually follow a straight line across the balance of the fiscal year.

### ANNUAL REPORT PURCHASING DEPARTMENT

#### July 1, 1957 — June 30, 1958

At the close of the year the Department was operating with ten employees,

There were 18,534 Purchase Orders, Purchase Order Changes and Purchase Order Cancellations written during the twelve month period.

All contracts and orders were awarded to the lowest responsible bidders on a competitive basis. The services of various testing laboratories were utilized to assure compliance with certain specifications.

Seven annual contracts for goods amounted to approximately \$399,105.90 and five annual contracts for services amounted to \$60,566.24. In addition, there were thirty bids held and orders written for commodities purchased on a monthly and a quarterly basis. Twenty-three bids were also held for non-routine goods and services such as furnishing and installing various X-ray equipment, floodlighting of parking area, furnishing laundry equipment, furnishing library shelving, expansion joints, steam kettles and the like.

Surplus commodities received from the Food Distribution Section of the State Department of Education were as follows:

Rice, 100-lb. sacks	lbs.
Dried powdered milk, 242-lb. drums 45	drums
Butter, 65-lb. average 965	cases
Butter, 32/1-lb. prints 100	cases
Cheddar cheese, bulk	lbs.
Cheese, processed, 30-lb. cartons	ctns.
Hardwheat flour, 50-lb. sacks 200	sacks
	sacks

The market value of these commodities was \$24,618.49, a reduction of \$19,107.00 below the value of those received the previous year. Prices were estimated upon prevailing market prices at the time of receipt of the commodity.

Respectfully submitted,

/s/GEORGE A. SANDERSON, JR. George A. Sanderson, Jr. Purchasing Agent

gas/av

## ANNUAL REPORT PERSONNEL DEPARTMENT

July 1, 1957—June 30, 1958

Total number of active employees as of June 30, 1958:.................3,182

As a result of a revision in the Civil Service Pay Plan, salary adjustments were made for 2,995 employees at the start of the fiscal year. In addition, increases were effected in the charges made for maintenance furnished employees to more realistically reflect the costs of these services to the Hospital.

A cyclical audit of all positions in the Hospital was made by representatives of the Department of State Civil Service. Two hundred sixty-five (265) position changes were tentatively recommended. These findings were distributed to the department heads for review and work is progressing toward resolving differences between this agency and civil service. In addition, three (3) regular audits of our personnel records have shown them to be in agreement with those maintained by the Department of State Civil Service.

In November, three (3) members of the Board of Trustees of the Louisiana State Employees' Retirement System were elected by ballots distributed and processed through this office. A campaign to interest employees in the purchase of United States Savings Bonds through the payroll deduction plan netted nine hundred eighty-seven (987) new subscribers during the month of April.

New personnel policies were instituted in January. Among these are an orientation check-list to aid supervisors when interviewing new employees and an inquiry into the status of employees serving their working-test periods. This inquiry is designed to weed out sub-standard employees.

Service ratings made this year produced two (2) outstanding, two thousand eight hundred four (2,804) satisfactory and eighteen (18) substandard employee ratings. Sub-standard employees, if not separated from their positions, will be re-rated after June 30, 1958.

All positions vacant on March 1, 1958, were frozen as an economy measure and employments into other positions were closely scrutinized in an effort to reduce costs. The work of employees serving under provisional or probational appointments was carefully evaluated and those who were not doing satisfactory work were removed from their positions.

Throughout the year, in order to increase the efficiency of this department, records have been checked and revised and those which are no longer of any value have been destroyed. In all things we have enjoyed the complete cooperation of the Board of Administrators, the Director, the Sisters of Charity, the department heads, the staff and the Department of State Civil Service.

Respectfully submitted,

/s/ CHARLES C. STURTEVANT, Charles C. Sturtevant Personnel Director

# ANNUAL REPORT of the SISTERS' DIVISIONS July 1, 1957 — June 30, 1958

Since detailed reports are being submitted by the various departments comprising the Sisters' Divisions, the annual report for the fiscal year July 1, 1957, to June 30, 1958, will be brief. The departments under the direction of the Sisters have been faced with many and varied problems during the past year, but we have continued our efforts to adhere to, and wherever possible, to improve, our standards of performance.

In regard to the Nursing Service Department, the screening program which has limited the patient census in the hospital during the latter part of the fiscal year has eased much of the burden placed on nursing service personnel in the management of patient nursing care, particularly during the summer months, when the normal vacation period strains an inadequate professional nurse staff almost to the breaking point. Increasing basic salaries in other hospitals, however, which we are not able to meet, are again taking toll, and it has become progressively difficult to maintain our staff or to attract any large numbers of new nursing personnel. This department continues in its efforts to place nursing personnel in the most essential areas, and to adequately train non-professional personnel for fullest utilization of service.

The School of Nursing maintains its national accreditation, although some difficulties still exist in regard to maintaining a stable and qualified teaching staff. While the primary aim of the School of Nursing is education of its students, the nursing care provided patients by student nurses is considerable and its importance can not be minimized.

The Dietary Department has continued in its efforts to improve meal service despite many grave problems. The quality of meals served is consistently high, although continuing increases in the cost of neseccary equipment, supplies and food items have harassed the department during most of the year.

The Housekeeping Department, which has the responsibility for providing a clean and attractive environment in patient areas and in living quarters for personnel, has maintained its high standards during the year. This department continues its efforts to provide an adequate linen supply throughout the hospital and to keep ward equipment in good repair.

On June 17, 1958, we were honored by a visit from Most Honored Mother Lepicard, of Paris, France, Superior of the Daughters of Charity of St. Vincent de Paul throughout the world. A public meeting and reception to which all hospital personnel were invited was held in front of the main hospital building. We are grateful for the many courteies extended by the Administrative Staff of the hospital to Mother Lepicard during her visit.

Near the close of the fiscal year, the director of the Sisters' Divisions was requested by the hospital administrative staff to form a sub-committee to prepare preliminary plans for maximum utilization of hospital facilities and provision of patient care during any major disaster. This committee was appointed with representatives from key departments, and progress toward disaster planning is going forward. When preliminary studies are completed, recommendations will be forwarded to the administrative offices for review prior to a joint meeting with medical personnel.

The program of renovation and repair in the Sisters' Living Quarters is ongoing, and the replacement of worn and out-moded equipment in the kitchen and laundry has done much to facilitate the operation of the residence and to improve its comfort and convenience.

We wish to again express our appreciation to the Board of Administrators and to the Administrative Staff of the hospital for the splendid cooperation which we have received in all of our endeavors during the past year. We pledge our best efforts to merit the confidence which has been placed in us.

Respectfully submitted,

/s/SISTER MARGARET
Sister Margaret, Director
Sisters' Divisions

Nurse Aides II and III	577
Nurse Aides I	92
Central Service Workers	118
Custodial Workers	20

The above figures include personnel giving services to hospitalized and out-patients, and who are under the direction of the Nursing Service Department.

The Nursing Service Department made some progress during the past year toward the attainment of its main objective, a stabilized and well-prepared nursing staff to give better nursing service to the patients of Charity Hospital. The availability of prepared nurses, particularly practical nurses, and the increase in the beginning salaries for this group of employees enabled the department to maintain its nursing staff at a slightly higher level during the winter months than has been possible in recent years. The usual downward trend in the number of professional nurses on the staff began in April, and has continued to the present. The decrease in the professional nurse staff has been offset by an increase in the number of

practical nurses. The figures below illustrate this modification of the nursing staff over the past four years.

	Professional Nurses	Practical Nurses
June 30, 1955	361	179
June 30, 1956	336	238
June 30, 1957	323	259
June 30, 1958	310	273

The number of professional nurses seeking permanent employment is steadily diminishing, especially for the evening and night hours of duty.

To ensure the best possible care for the patients, every effort is being made to better utilize the services of the professional nurse. Many of her activities are directed toward the nursing care of the critically ill patient and management of the practical nurse and nurse aide. The effectiveness of this plan is dependent to a great extent upon the individual nurse, her educational background, and experience. It has demonstrated clearly, need for strengthening the Nursing Service staff education programs. To accomplish this a series of meetings were planned and conducted for professional nurses, practical nurses, and nurse aides, with emphasis on better utilization of nursing service personnel. Aware of the need for more effective supervision at the head nurse and supervisory levels, a one-day meeting on the application of the art of supervision was presented at Charity Hospital for this group of employees. The Nursing Service Department combined its resources with those of the Louisiana League for Nursing to make this very worthwhile program possible. The services of Miss Evelyn Zetter. Field Service Consultant, Department of Hospital Nursing of the National League for Nursing were secured to direct and conduct the program. meeting was attended by 150 head nurses and supervisors from the Charity Hospital nursing staff and the benefits derived are evident in the improvements in this area of nursing service. Interest and participation has been stimulated in the orientation plan for newly employed nurses, service rooms on nursing units rearranged to facilitate the performance of nursing activities, inventories made of medicine and supply cabinets and more economical measures instituted for the maintenance of drugs and supplies. and attitudes developed which promote planning for better nursing care of patients.

The need for 24-hour daily nursing service coverage by professional nurses is still a major problem in staffing the nursing units. This responsibility receives great emphasis in planning time and duty assignments, but the fact remains that there are not enough professional nurses available to adequately staff the units for afternoon and night duty.

The Nursing Service Committee for the revision of nursing procedures has not been too active this year. Two procedures have been written, one revised, and changes made in the record forms for patients' charts. Operational information was kept current through the revision and distribution of ten policies which relate to the nursing care of the patient.

The Nursing Service Office staff participated in orientation programs for residents and interns, dietary interns, physical therapy students, volunteer workers, clinical instructors in the School of Nursing, and student practical nurses. Community responsibility for health education and services was shared through representation in the New Orleans Hospital Council the American Red Cross Nurse Enrollment Committee, the Council of Social Agencies, and the Volunteer Advisory Committee of the Hospital Volunteer Service.

In-service education remains an essential function in the orientation and job preparation of employed practical nurses and nurse aides. Through programs conducted this past year, 20 practical nurses and 76 nurse aides completed classes for developing the necessary skills and desired attitudes to carry out job assignments and experience job satisfaction.

The Nursing Service Department had three classes of student practical nurses for clinical experience from the Booker T. Washington High School. Two classes completed the 32-weeks' program and 38 students were graduated. The third class which was admitted on March 13, 1958, has 18 students enrolled. The L. E. Rabouin Vocational School sent 11 student practical nurses to the department for six weeks of clinical experience on the pediatric service. The Jefferson Parish Trade School which offered a 244-hour extension course for licensed practical nurses also used the facilities of Charity Hospital for this program. The class was completed in January, 1958, and nine students received diplomas.

The Premature Infant Center personnel continued to offer a program of orientation and observation in the care of premature infants. The classes in Improved Care for the Premature Infant were attended by five graduate professional nurses, four practical nurses, and one nurse aide. In addition, shorter periods for the orientation to the care of premature infants were provided for 33 Public Health Nurses and Trainees, one graduate professional nurse, 21 practical nurse students, 250 professional nurse students, 14 students from the Tulane University School of Social Work, and 12 volunteer workers. It is interesting to observe that the Premature Center, which has facilities for 120 babies, had a record low census of 28 during March, 1958.

The Personnel Health Clinic, located in C602 reported 4,527 patient visits during the fiscal year. In addition, immunization programs for typhoid fever, pollomyelitis, and asian influenza were conducted, with a total of 4,022 injections given.

In setting goals for the coming year, more effective use of nursing service personnel and improvement in the practice of nursing at all levels must be considered. Sheer numbers is not the answer to providing good nursing care. To achieve this end, the seeking of facts and means needed to promote leadership, guidance, and inspiration will be included in the objectives of the Nursing Service Department.

Respectfully submitted.

/s/SISTER LAURENCE
Sister Laurence, R.N., Director
Nursing Service Department

### ANNUAL REPORT

### of the

### CHARITY HOSPITAL SCHOOL OF NURSING July 1, 1957 — June 30, 1958

### EDUCATIONAL PERSONNEL AND FACILITIES

The turn-over among instructional personnel continues to be a major problem. During the current fiscal year there have been ten resignations and five of these positions are unfilled. All instructors doing actual teaching have their basic degrees and five have a Masters degree. One is returning from a year's leave of absence where she earned a Masters degree.

The educational building will be ready for use in September. This will provide two laboratories (Science and Fundamentals of Nursing), two lecture rooms, a practice ward, and seven offices. These replace classroom and office space now used on sixth floor of hospital.

Equipment added include a tape recorder that was purchased and a skeleton and a torso model that was donated by Nursing Service.

### STUDENT WELFARE

Residence. The total number of residents is 397. Of these 342 are student nurses, 251 Charity, and 91 Affiliates; 47 anesthesia students, and 8 staff. The bed census has been reduced by converting the large majority of three bedrooms into two bedrooms; it is now 400.

The interior of the building was painted and looks quite attractive. The flooring in a large number of rooms is in need of replacement.

### RECRUITMENT AND FINANCIAL AID

Recruitment was done primarily by mail. Visits were made to three local high schools by members of the faculty and students; upon invitation visited one school. Open House was held for the high schools of Orleans and surrounding parishes; 119 high school students attended. 1,014 inquiries were received, 252 applications processed, 126 accepted, 89 rejected, and 103 admitted. Of this number, 64 were from Louisiana.

The hospital granted loans of \$190.00 each to seven students. Nine students were granted scholarships by various organizations. Fourteen loans ranging from \$25.00 to \$100.00 were made from the Kellogg Loan Fund to students in the school. Students worked on a pay basis during their vacation and their days off, working a total of 2,314 days.

### AFFILIATIONS

The school maintains affiliations with 16 schools, 3 from Louisiana, three from Alabama, one from Arkansas, two from Florida, four from Mississippi, and one from Texas. One affiliation, Hotel Dieu of New Orleans, was discontinued.

There is a daily average of 101 affiliates. Of these the majority are in Pediatrics with a range 64 to 79 students.

### STATE BOARD OF NURSE EXAMINERS ANNUAL REPORT

The Educational Supervisor of the State Board of Nurse Examiners made a one-day visitation of the school on August 14, 1957. She had a conference with the instructional personnel and visited the pediatric and obstetric divisions.

The report is on file in the office of the Director of the Hospital, The conclusions drawn were as follows:

"The educational program is progressing with some difficulty because of a shortage of teaching personnel. Constructive planning is however, going forward. Limited supervision of students when assigned to the evening and night periods is a problem that needs to be solved. The next steps in the forward progress that the school is making will undoubtedly be worked out by the faculty group."

#### ACKNOWLEDGEMENTS

We appreciate the interest and courtesy which we have been accorded by the Hospital Administration and the Board of Administrators.

Respectfully submitted,

/s/ SISTER PAULINE
Sister Pauline, R.N.
Director
School of Nursing

## ANNUAL REPORT DIETARY DEPARTMENT July 1, 1957 to June 30, 1958

### ACTIVITIES AND ACCOMPLISHMENTS

Eleven Dietetic Interns completed their training during the fiscal year and were granted membership in the American Dietetic Association, making a total of 157 since the establishment of the internship in 1944.

During the past year, a total of 26,295 patients were seen and instructed on special diets in Nutrition Clinic. Of these, new reduction diets totaled 1,787 and reduction revisits totaled 5,010. The number of diabetics instructed individually was 1,852. Many of these returned for reviews and additional advice on their diet. Besides, the individual diabetic instructions, 548 patients, relatives, and attendants attended diabetic class, where supplementary instruction is given weekly. Various other special diet instructions (which included the following diets and variations: Bland, Restricted Sodium, Low Fat, Low Residue, High Protein, Low Purine, Low Protein, Low Cholesterol, Colostmy, Low Calcium, Soft, High Residue, Low Phosphorus, High Caloric, Tube Feeding, Allergy, and Dry) totaled 1,001.

Obstetric Clinic referred 10,603 pregnant women for diets:

9,650 were instructed on Normal Diets

742 were instructed on Toxemia Diets 211 were instructed on Reduction Diets

Total broken appointments for revisits on Reduction and Various Special Diets were 3,735.

Thirteen Dietetic Interns rotated through Nutrition Clinic. Each was assigned for a period of 5 weeks, one week of which was spent with a City Public Health Nurse visiting patients and attending Well Bady Clinics. The fifth week was started this past September and has proven beneficial to the Dietetic Intern, the Nurse, and Patients seen.

Seventy-one Student Nurses rotated through Nutrition Clinic. Each was assigned for a period of one week.

During the fall term, a Clinic Dietitian spent the moring of each Friday at Tulane Medical School Diabetic Clinic, instructing patients and acting as dietary consultant to the Medical School Staff and Students.

Some changes have been made in the food service on various floors, which have proven beneficial.

Nourishments are now delivered to the patients at bedside. This permits a closer check and eliminates waste, due to the individual attention given the patient.

Iced tea is now served at the noon meal.

Diabetic bedtime feedings are being placed in paper bags and put in the refrigerator, which insures better control.

A cafeteria type service has been instituted on the 3rd Floor, which is most satisfactory. A selective menu has been offered to the patients, which has eliminated much waste.

Tray service on the 4th Floor has been divided into two separate operations for the white and colored wards. This system has resulted in a more efficient, faster, meal service, which allows more time for other routine pantry duties, and enables the Dietitian to visit patients during meal service.

A procedure guide has been written for each floor to follow, in order to insure uniformity of operation.

Tray racks have been painted for all floors.

There have been no changes in procedures in the Formula Room, or in infant formulae.

A CBM (Concentrated breast milk) high caloric formula study was done on premature infants by the Premature Center. This study was carried on for several weeks and was discontinued in March. The Formula Room was responsible for the preparation of this formula.

No new equipment was purchased for the Formula Room this past year, and only minor repairs were needed on present equipment.

In August, 1957 a Dietitian was employed to supervise the food service in the Student Nurses' Residence and Outside Buildings. She has instituted a Food Cost Accounting System in the Nurses' Kitchen, and renders a monthly report to the Department Director. She has also set up a portion control system, and the use of standardized recipes, resulting in less waste and left-overs. This project in not yet fully completed.

A new potato peeler was installed in September, and four dishmachine racks were replaced.

The entire Kitchen area was painted with the exception of the Storeroom, but no other major repairs were needed.

The White and Colored TB Building was closed in September, 1957. White patients were removed to the Dibert Building, and colored patients to the Colored TB Building. The pantry equipment was distributed elsewhere as needed.

New window screens and shades were placed in Colored TB Building by the Housekeeping Department.

A Portion Control System was developed in the Main Kitchen in an attempt to minimize food waste and improve the food service to patients. This system has improved the food service to some extent, but there is still much work to be done for further improvement. At the present time the Staff Dietitians and Dietetic Interns are working towards improving the portion control system to suit the needs of the Hospital's food service.

Recently the department has been serving individual cereals to the patients during the breakfast meal. This method has reduced waste and labor as well as improving the appearance of the trays served to the patients.

The house menus were revised recently. A new set of rotating menus (5) was designed. These have facilitated food ordering, food preparation, and service.

New equipment: Seven (7) stainless steel steam kettles were purchased for the Main Kitchen, as well as a Hobart dishwashing machine (double tank); a stainless steel refrigerator for cold food items to service the Doctors' and Faculty Dining Room during meal periods; a new meat block

for the Butcher Shop; and a hot food cart for the 6th Floor Pantry after reconstructions are finished.

The entire Main Kitchen area was painted including all Dining Rooms and Department Offices. All office files were mounted on rollers.

The Colored Employees' Dining Room was eliminated and is being used now for the Colored Visitors Food Service. Colored employees use the General Dining Room which was previously used for white employees. The White Nurses' Dining Room is also used for white employees at the present time.

The room previously used for the Colored Visitors Food Service was painted and prepared to be used as a storeroom for paper and supplies. Repairs were also made in the daily storeroom in the kitchen and it is used for groceries, staples, etc. New screens were put on all windows in the kitchen. New cabinets were installed in the vegetable room.

A large cabinet was made by the Maintenance Department for the Educational Director's Office for mimeograph forms, books, etc.

The floor in the elevator used for the transportation of garbage from the pantries to Main Kitchen was changed. Both the food elevator and the garbage elevator were painted.

A daily report is being made on all garbage returned grom the floors dining rooms and main kitchen. The total census is taken and divided into the number of pails of garbage, and the percentage obtained of garbage per pound per 100. This is done for 3 meals daily.

Comparative figures of meals served are listed below:

	1956-1957	1957 - 1958
Personnel Patient Meals	1,327,227 2,484,219	113,701 2,194,313
Total Meals	3,811,446	2,308,014
Special Diets Served	396,484 103,361	455,628 100,620
MEAL COSTS:		
Food	\$1,017,416.47 484,342.57 68,203.18 13,511.18	
Total Donations	\$1,583,473.40 \$ 20,136.52	

### RECOMMENDATIONS

We again ask that a survey be made of the garbage disposal problem confronting the Dietary Department, with a view towards devising a more efficient method of handling this problem.

Garbage disposal units should be installed in each floor pantry.

A study should be made of the floor pantries with a view to remodelling them for greater efficiency and service.

A survey should be made of a new type of tray racks for the patients food service.

A cafeteria counter should be installed on the 3rd Floor to improve the service to the patients on this floor.

### APPRECIATION

We are grateful for the assistance and cooperation rendered us by our Director and his assistants, the Board of Administrators, the Sisters, the Medical Staff, Nursing Department, the Engineering and Maintenance Departments, and all other Departments, especially those who assisted us in our teaching program for our Dietetic Interns.

Respectfully submitted,

/s/ SISTER THERESA, Sister Theresa, Director Dietary Department

### ANNUAL REPORT HOUSEKEEPING DEPARTMENT July 1, 1957 to June 30, 1958

The turnover of personnel, including Linen and Sewing Section, was 105. Of this number there were 66 resignations, one retirement, 35 removals and three transfers to other departments.

Four additional positions were added to Housekeeping payroll by the transfer of three Custodial Workers II from Premature Center, and one Custodial Worker II from Physical Therapy Section.

Mattress renovation was limited to a total number of 86: 59 adult mattresses, 2 crib, and 25 bassinet.

Germicidal disinfection to walls, ceilings, cabinets, floors and furnishings was done in all the laboratories of the Pathology Department. White and Colored Nurseries on 10th floor also received complete germicidal disinfection.

With the use of the new and improved floor cleaning detergents which do not require rinsing, the frequency of floor cleaning in all patient care units has been increased from once every third week to three times per month.

A change was made in the pest control service effective August 16, 1957. Two Pest Control Worker positions were established on the Housekeeping payroll for the work of extermination. The services of the A. & M. Pest Control Company were retained for training the men and to assist in a supervisory and consultation capacity for particular problems encountered. This has been an excellent arrangement, and the first successful program of extermination the hospital has experienced.

Contract services for window cleaning were satisfactorily performed by the National Window cleaning company.

In the Salvage Division, \$2,071.57 worth of salvage material was sold to salvage dealers.

The following linen replacements were made:

200 Bedspreads

8,176 Sheets for adult beds

8,213 Sheets for juvenile beds and rollers

1,193 Crib sheets

900 Bassinet sheets

8,682 Pillow cases

6,852 Bath towels 7,954 Huck towels

2,185 Kitchen towels

13,044 Surgical towels

20,947 Wash cloths

9,686 Patient gowns

2,610 Pajamas

809 Robes

1,851 Large pads

1,007 Bassinet pads

18,546 Diapers

1,842 Baby wraps

649 Hamper bags

182 Trash bags

1,502 Aprons

796 Doctors operating gowns

716 Doctors operating shirts

539 Doctors operating trousers
781 Nurses first gowns
616 Nurses 2nd gowns

479 Nurse Aid gowns

287 White smocks 312 Green smocks

7,416 Sterile wraps

346 Curtains

532 New Pillows

1,683 New blankets

267 Mattress covers
15 Crib covers
71 Dining room tablecloths

We gratefully acknowledge the interest and support which has been extended to the Housekeeping Department by the Board of Directors, Doctor L. J. Kerne, and the Administrative Staff at all times during the past year.

Respectfully submitted,

/s/ SISTER CLARISSE Sister Clarisse Director of Housekeeping The fiscal year ending July 1958 has shown a definite increase in the request for certain plastic items that are now available already sterile and in cellophane packages. There has been a marked increase each month for more sterile dressings, towels, and sheets than in any given period. The sterilizers have been taxed to the maximum capacity during each 24 hour period.

There has been good cooperation between the Maintenance Department which are responsible for the upkeep of the department sterlizers and equipment.

The good working relationship with Pharmacy, Purchasing, Personnel Laundry, and Housekeeping have helped us over the crucial period.

The following new equipment has been requisitioned, received and put into service:

Gomco E.N.T. Suction Machines No. 930	6
Pair Bed Rails	20
Stethoscopes	144
Steinland Steel Trainet	工作品
Stainless Steel Urinals	144

Dotter Paratheter	1
Dotco Respirator and Deep Breather	1
Monoghan Ventalung (General Ward Use)	2
Monoghan Ventalung (Dibert Bldg.)	1
Dry Plate Foot Printing Process Set (9th Floor Pediatrics)	1
Hot Plates (Madden 1 Tocess Set (9th Floor Pediatrics)	1000
Hot Plates (Medical and Surgical Use)	48
Top-Off Openers for Infusion Bottles	288
Trays for Patient Tablets	288
Plastic Pill Counting Trays. (One has been placed in each narcotic	
box)	100
7777 7777777777777777777777777777777777	100

The following equipment was added to the Orthopedic Traction equipment:

Bohler Steinman Pin Holders, Large Bohler Steinman Pin Holders, Medium	12
Bars and Straps for Beds	36
Zimmer Weight Holders Pelvic Traction Belts, Medium	36
Pelvic Traction Belts, Small	2

There has been a systematic check of centrifuges in the Ward Laboratories and an earnest effort has been made to meet the need for regeants, solutions, and other equipment.

The Proctoscopic Clinic equipment was kept in repairs and the services of a Graduate Nurse or Nurse Aides were provided for Emergency Ward and Infirmary Patients.

The following number of cases were scheduled by regular clinic appointments:

	Clinic	Ward
Tulane Surgery	1,682	703
Independent Surgery	830	140
L.S.U. Medicine	110	135
Tulane Medicine		250

The Gastroscopic Room was serviced with Graduate Nurses and Nurses Aides to assist the Doctors. The attendance of the Visiting Doctor Staff and Resident Staff has been excellent. The following number of cases were seen:

Tulane Medicine	137
L.S.U. Medicine	
L.S.U. Surgery	

The Surgical Prep Team completed 8,477 Surgical preps during this period.

Thermometers are sterlized and prepared in the following Central Services: 3rd, 4th, 5th, 7th, 8th, and 11th, using Wescodyne Solution ½% as the chemical agent.

There is need for a definite planning for better facilities to clean and powder gloves. There are many articles written about contamination from the powdering of unsterile gloves. Dr. Carl Weathers recently made a statement that contamination has been carried into the Operating Rooms through the air condition system. I know definitely there is a constant fallout of powder in the Central Service and in the Autoclave Room. A glove conditioning room is the only solution to prevent the possibility of contaminating sets and equipment already sterilized. By planning a safer routine of caring for gloves the facilities could be used by Emergency Room, 10th Floor, and Operating Rooms on a very cooperative base.

It has been impossible to complete the work assigned to Central Service in any given period; except during the months of May, June, and July. The request for the transportation of patients to the various areas in the hospital and Medical Schools has increased to such a point that many times the proper care and handling of used supplies is impossible. Every effort has been made to regulate the time schedule so that the department may make the best use of the employee.

In the month of February the 11th Floor Central Service was opened; to this new area a Graduate Nurse I was assigned. In April there was the resignation of a Graduate Nurse I. The department is now short these two positions which are badly needed as relief on the Floor Central Services.

I hope that in the near future it will be possible to consider the personnel needs of Central Service so that we may be able to meet the request for our services and also prevent the use of shortcuts that may be employed in the handling and caring for used material and equipment when employees are pushed for time and do not have proper supervision.

cc: Sister Laurence Sister Margret

## ANNUAL REPORT DEPARTMENT OF PATHOLOGY July 1, 1957 to June 30, 1958

Enclosed is the Annual Report of the Department of Pathology for the fiscal year 1957-1958. The total number of tests performed in the Diagnostic Laboratories was 1,077,677 an increase of 69,396. The total number of autopsies performed reached the all-time high of 2,198 an increase of 180 over the previous year.

It seemed important to determine the monetary value of the work performed in the department. The Medicare fee schedule for Louisiana was applied to the individual tests for the year 1956-57, and it was found that it would have cost the staggering amount of \$3,485,205.00 if the patients had been required to pay the costs. I am attaching a copy of the computation. It is expected that the 1957-58 figure would be substantially greater.

The Virology Laboratory completed its first full year of operation. Practically all the capital equipment has been obtained and expenses now are for personnel and expendable items. It is proving useful in the diagnosis of virus infections and suspected virus diseases.

During the year the Electrolyte laboratory was opened and an additional Coleman Flame Photometer was installed. Sodiums, potassiums and transaminases are performed in this unit. These determinations are an important addition to the services offered by the Department.

It was necessary to replace two pieces of equipment. One, a refrigerator in Bacteriology to replace one about twenty years old that could no longer be repaired and was a discontinued model for which parts were not available. The other, an Autotechnicon for Histology to replace a worn one that had been in use about fifteen years and is also a discontinued model.

There has been a considerable shortage of technical personnel throughout the year and there are a number of unfilled vacancies. The large volume of work during this time has been performed only because of the great devotion to duty and frequent personal sacrifices by the Technologists and other members of the Staff.

One member of the professional Staff was lost by death. Dr. George Fasting, a member of the Staff since July 1, 1932, deid on May 26, 1958.

I wish to express my deep appreciation to you for your help and cooperation as well as to all other individuals with whom we have had dealings.

With kindest personal regards.

Sincerely,

/s/ EMMA S. MOSS, Emma S. Moss, M.D., Director Department of Pathology

ESM:sb

### CONTENTS

- 1. Personnel as of June 30, 1958.
- 2. Report of School of Medical Technology.
- 3. Consolidated report of the Diagnostic Laboratories of the Department of Pathology.
- 4. Report of Division of Surgical Pathology.
- 5. Report of Division of Pathologic Anatomy.6. Report of the Pasteur Institute.
- 7. Report of the Morgue.
- 8. Detailed report of the various laboratory divisions.

### PERSONNEL AS OF JUNE 30, 1958

### STAFF

Emma S. Moss, M.D., F.A.S.C.P., F.C.A.P., Director, Certified American Board of Pathology: Pathologic Anatomy and Clinical Pathology Monroe S. Samuels, M.D., Associate Pathologist, Certified American Board of Pathology: Pathologic Anatomy and Clinical Pathology Thomas D. Davis, M.D., Assistant Pathologist Quincy Ray Johnson, M.D., Assistant Pathologist Marion W. Hood, Ph.D., Microbiologist

### ANNUAL REPORT HEART STATION

July 1, 1957 — June 30, 1958

The accompanying report shows the work performed in the Heart Station from July 1, 1957 through June 30, 1958. The figures refer to the number of electrocardiograms taken in each month, and to the number of arterial oxygen saturation studies, cardiac catheterizations, angiocardiograms, and cardiac fluoroscopic examinations.

Many sound tracings of the heart were made during the current year but the breakdown for months is not available although the data were placed in the patient's records.

During the year cardiac clinics were conducted every afternoon, Monday through Friday, in order to maintain a closer check on patients with heart disease. There was also a pediatric clinic which is conducted every Friday.

I. Electrocardiograms	
July 3,100	January 3,145
August 3,126	February 2,839
September 2,954	March 3,036
October 3,188	April 2,884
November 2,715	May 2,708
December 2,401	June 2,681
Total	34,777
II. Arterial oxygen saturation studies	
III. Cardiac catheterizations	
IV. Angiocardiograms	95
V. Cardiac fluoroscopic examinations	

Respectfully submitted,

/s/ LOUIS LEVY, Louis Levy II, M.D.

# ANNUAL REPORT BRAIN WAVE LABORATORY July 1, 1957 to June 30, 1958

The following is the annual report of the Department of Electroencephalography for the year 1958. The report is broken down into the number of EEG recordings made per month and the number of special recordings made.

July 1957	117	January 1958	141
August 1957	191	February 1958	
September 1957	157	March 1958	145
October 1957	177	April 1958	154
November 1957	126	May 1958	95
December 1957	121	June 1958	97
Total EEG Recordings			1,632
Fetal Heart Recordings			52
Tumor Correlation Recordings			450

The laboratory continues the lack of instruments and personnel to be able to handle the requests of the clinics. The present policy is to hold the ward requests down to a point that the laboratory is only two weeks behind. It would be possible, however, to accept ward appointments for as much as one month in advance. It is hoped that adequate instruments, technicians, and housing facilities might be provided in the near future so that this department will be able to take care of ward and clinic requests irrespective of number.

Respectfully submitted,

/s/ H. THARP POSEY, H. Tharp Posey, M.D., Director Brain Wave Station

# ANNUAL REPORT ANESTHESIA DEPARTMENT, RECOVERY ROOM, INHALATION THERAPY DEPARTMENT AND THE BLOOD AND BONE BANK

July 1, 1957—June 30, 1958

There were twenty-four thousand anesthetics of all types administered, including local, throughout the hospital. The demand for anesthesia for complicated procedures has continued to increase. This in turn increases the demand for the services of more highly skilled personnel, such as that rendered by the residents and full-time staff members. We have found by the experience of the past several years that we need a minimum of 15 residents to man the department with the number of operating rooms in use. I request that this quota be continued, unless the number of operating rooms and delivery rooms in use be reduced.

Some of the equipment in the department has reached the state of obsolescence. In particular, we have five old style McKesson machines. Parts are no longer available for them. I suggest we turn these in and replace them with modern machines. All of the equipment in the department is nearly twenty years old.

A difficulty which has plagued the department and continues to plague it is the difficulty in obtaining supervisory personnel. This is so important in a department such as this in which the bulk of the work is performed by student personnel. Two difficulties are present: (1) few people willing to teach and (2) the salaries paid to our full-time personnel, particularly the physician personnel, are the lowest in the country when one compares this institution with others of the same size and calibre.

The American Board of Anesthesiology has stated categorically that we must have a minimum of three full-time assistants in Anesthesiology. The budget of the department should be set up for three at salaries that will be an inducement for people to stay on with us for a year or two. This is of utmost importance if we are to retain approval of our training program.

We are grateful to the Louisiana Heart Association which has for the past two years subsidized the salary of an assistant to supervise cardio-vascular surgery. They have agreed to do so during the coming year. They, however, feel they cannot do so after this year. Dr. Carl Pope is presently on the staff in this capacity.

We were able to obtain a research grant from Squibb and Company which will in part subsidize the salary of Dr. Frank Summers, who will remain with us for another year as an assistant.

Forty student nurse anesthetists and 6 residents completed their training during the year.

The Blood Bank personnel collected 21,825 units of blood and released 19,300 for transfusions.

One notable advance in our Blood Bank is the establishment of a parttime position of Assistant to the Director of the Blood Bank in charge of the laboratory. This was sorely needed. Dr. Monroe Samuels, a member of the Department of Pathology, is the present incumbent. His duties are to oversee the laboratory procedures and to handle special problems concerning typ-

ing, matching and other phases of hemotology. He will be assisted by resident pathologists whom Dr. Moss has agreed to rotate through the Blood Bank Laboratory as part of their training. I would like to commend the personnel of both the Donor's Station and the Laboratory on the splendid cooperation that they have shown. In the Laboratory especially they have carried on in spite of the shortage of technologists.

We find it impossible to recruit technologists even though the salaries are more than adequate. There simply aren't any.

With utmost reluctance, I finally yielded to the unsurmountable pressure of the times and fell in line with the policy prevalent throughout the hospital by adopting a five day week for all employees under my charge, except for Inhalation Therapy technicians, who work six days. Student personnel continue to be on duty seven days a week, however.

Sincerely yours,

/s/ JOHN ADRIANI,
John Adriani, M.D.,
Director
Department of Anesthesia

# ANNUAL REPORT LUNG STATION

July 1, 1957 to June 30, 1958

The work of the Lung Station increased very significantly in the fiscal year from July 1, 1957 through June 30, 1958. A gradual increase in both the utilization of standard Lung Station facilities and in the number of services offered has characterized our unit since 1953. This growth cannot continue unless the part-time services of an additional physician become available.

Routine ventilatory studies were done on 411 occasions. More extensive studies for the evaluation of emphysema were performed on 440 occasions, about twice the figure for 1956-57.

Respiratory function studies involving the determination of arterial blood gasses at rest and with exercise were carried out on 52 individuals during the year. This is a significant increase over the preceding year, despite the fact that we were unable to do such studies for three months while seeking a new technician. Other respiratory studies were carried out on 59 occasions; these are usually done in conjunction with Heart Station studies.

Bronchospirometry was done only twice during the year. However, the fluoroscopic estimation of breathing dynamics and ventilatory distribution was done on 155 individuals.

Special diagnostic studies are available in the Lung Station for those few patients who cannot be adequately studied on the ward. Diagnostic bronchial lavage was done on 9 patients, thoracentesis on 9, and needle biopsy on 19. Special diagnostic studies were done on 2 patients.

Despite all attempts to restrict the therapeutic facilities of the Lung Station to the more seriously incapacitated out-patients, therapeutic inhalation under intermittent positive pressure breathing was given 1,681 times. This is a three-fold increase over the previous year. Since Central Service has made such equipment available to ward patients, and thereby decreased the demand on us, this reflects primarily an increased utilization of this form of inhalational therapy for ambulatory patients. We have had to refuse this type of treatment to some patients who were less seriously involved, and to reduce the number of treatments to a minimum. There is a great need for an active department of inhalational therapy which would be available to out-patients and which would supervise therapy to in-patients.

Respectfully submitted,

/s/ JOHN H. SEABURY,
John H. Seabury, M.D.,
Director, Lung Station
Charity Hospital of Louisiana
at New Orleans

JHS:nr

# ANNUAL REPORT ALCOHOLIC REHABILITATION UNIT July 1, 1957 to June 30, 1958

This ten bed in-patient facility for white male alcoholics has continued to function as a unit for the medical treatment of the acute alcoholic withdrawal syndrome. During this period of time there were 246 admissions to the ward. The average in-patient stay was 15 days.

The director of the unit has been called on several times during the year to give talks on alcoholism to various civic and religious organizations in the city of New Orleans. The director is on the staff of the New Orleans Police academy and regularly gives lectures on alcoholism to the student police.

All members of the Rehabilitation Unit have continued to cooperate with alcoholic agencies in the city and state in the management of the problem of chronic alcoholism.

Sincerely,

/s/ JOHN B. BOBEAR,
John B. Bobear, M.D.,
Director, Alcoholic Rehabilitation Unit
Charity Hospital of Louisiana

JBB:fcc

# ANNUAL REPORT PREMATURE INFANT CARE PROGRAM

July 1, 1957—June 30, 1958

The Premature Infant Care Program of Charity Hospital continued to provide its specialized services with no major administrative policy changes throughout the year. The basic routines and policies for care of the premature infant, established last year for sake of simplicity and uniformity, continued in effect for most infants at the discretion of the responsible pediatric resident. The Premature Infant Follow-up Clinic, held each Monday on the second floor of Charity Hospital, continued its routines of operation for well-child care of the premature infant, stressing guidance through group counselling. By design, this follow-up care program is concerned not only with service for the particular patients and problems related to prematurity, but also of primary concern is an evaluation of patterns of growth, development, and health in these ex-premature infants as judged by history, hemotological studies and dietary analyses. Partial support for this program has been obtained from an outside grant through Tulane Medical School. Review of the initial group of over one hundred prematures invited to become enrolled in this Premature Follow-up Care Program reveals a 94% rate of completion for the visit four months after discharge, a 100% completion of the twelve month visit and an 84% completion of the twenty-four month visit during this fiscal year of operation. The new maximum census of ninety-six babies in the Premature Infant Nursery in accord with the unit plan of operation adopted last year has continued to be a realistic load in view of concurrent policies for staff vacations during seasons of lightest load. The services of the formula room and medical social service department have continued to be effective. Specific details and analyses of our services during this year are illustrated in the accompanying tables.

Educational activities in relation to the Premature Infant Care Program have continued much the same as in years before. Medical students from both medical schools and residents of Charity Hospital have continued to be provided with educational training and experience in the care of premature infants. Graduate nurse training programs were offered three times during this year and the registrants participated fully in the activities provided them. Student nurse classes, in groups of eight to ten students each, have been provided at regular intervals for a period of two weeks each, as the students rotate through their training program in the School of Nursing. An exhibit on the care of the premature infant has been prepared and placed on permanent display in the hallway of the Premature Infant Center for all visitors to make use of as they tour our facilities.

Investigations completed during this fiscal year include five projects by senior medical students on a variety of characteristics in the premature infant, such as assays of intrinsic factor, glucose tolerance studies, blood fibrinogen levels, evaluation of heart sounds, and a preliminary study of premature infant morbidity and mortality during their first two years of life. A long term staff project was begun this year by Doctors W. Quiros and Newsom and Miss Louise Pesut on an intensive evaluation of the effect of Imferon on serial hemotologic measurements and health standards in premature infants. One of the above studies has been published and at least two others are due for publication soon. Considerable work and planning was carried on by our entire staff this year to assist in the inauguration of the Collaborative Child Development Program, which will be concerned with many problems related to those of the premature infant.

#### DESCRIPTION OF TABLES

- Table I: Comparative Caseload by Source and Outcome. This tabulation reflects the variations in caseload by 250 gram weight groups and indicates a slight decrease in the percent of our total caseload which is admitted to us from other hospitals.
- Table IA: Total Hospital Patient Days for Inborn and Outborn Infants in the Premature Nursery. From our last fiscal year there was a 19% reduction in the number of patient days provided for. At the same time this reflects a reduction from 35 to 29% of hospital patient days being devoted to care of outborn infants.
- Table II: "Diarrheal Syndrome". This table presents some pertinent highlights of our most disturbing problem, constantly with us in the
  Premature Infant Center, namely, diarrheal disease. For the purpose of case finding, we have arbitrarily defined a diarrheal syndrome to exist when a baby is noted to have at least three unusual stools during any seven day period after the first week of
  life. This definition is admittedly severe, however it serves admirably to pinpoint potential danger areas and threatening epidemics. Such records as these are maintained daily from the
  nursing notes and tabulated weekly for all of the staff to review
  and manage their caseloads accordingly. Insofar as this data
  collected was valid, we have experienced a significant reduction
  in the attack rate and mortality rate for this syndrome during
  this fiscal year.
- Table III: Relationship of "Diarrheal Syndrome" to Duration of Hospital Stay. This table illustrates one of the many problems concerned with this "diarrheal syndrome", namely an associated prolongagation of hospital stay in those babies having the syndrome. The important problem of whether this represents cause or effect is yet to be clarified by analysis of future data collected in a similar manner. Recognizing the overall attack rate of 20 to 40% for this syndrome, the currently accepted administrative policy of discharging all infants as soon as they are mature enough to be cared for by their parents is practiced so as to minimize both overcrowding and prolongation of the exposure to this endemic problem of unknown but suspected viral etiology.
- Table IV: Caseload and Survival Rate for Inborn Premature Infants. This standardized table illustrates the expected differences in survival by birth weight and race.
- Table V: Caseload and Survival Rate for Outborn Prematures. Similar percentages and tabulations are herein compiled as was done in Table IV.
- Table VI: Comparative Yearly Survival Rates for our Total Admissions to the Premature Infant Nursery. The cumulative survival rates for the last three fiscal periods show no significant changes although there is a slight improvement in our survival rate for inborn infants.

The entire staff of the Premature Infant Care Program is sincerely grateful to the administration of Charity Hospital for their encouragement and support of certain statistical facilities including our first IBM machine; for the very great help and stimulus such facilities have provided our staff both

for daily care of patients as well as our continual striving for improvement in our methods.

Respectfully submitted,

/s/ WILLIAM T. NEWSOM, William T. Newsom, M.D., Premature Infant Care Program

John M. Bruce, M.D.
Louisiana State Medical Society
Ambrose H. Storck, M.D.

## Ambrose H. Storck, M.D. SCOPE OF THE PROGRAM

There has been little change in the objectives and operational procedures as they were described in the report for the previous fiscal year. The staff in the Registry continues to work toward maintaining, from a central location, the following Record Systems to indicate the size and nature of the cancer case load of this hospital.

- (1) An Alphabetical Index File on the identification of cancer patients known to this hospital since January 1948, with continuous new accessions added.
- (2) A file of case abstracts, summarizing pertinent data from the patient's hospital record, complete with annual informational follow-up.
- (3) Punch cards containing the coded information from the abstracts and follow-up reports for statistical analyses, or identification of patients by subject matter through electric machine accounting.
- (4) File on the request and release of information from Registry records according to date, subject matter, purpose, etc.

In addition to the above, there is available other information such as statistical analyses, publications, exhibit material, graphs and charts, lantern slides, etc.

### ACTIVITIES

### COOPERATIVE PROGRAM WITH CANCER CHEMOTHERAPY NATIONAL SERVICE CENTER

This Registry is one of approximately fifteen registries throughout the country which for the past two years has submitted data on punch cards to the End Results Group, Clinical Studies Panel, Cancer Chemotherapy National Service Center, National Cancer Institute, which functions within

the U. S. Public Health Service. These registries are participating in this cooperative program through contractual agreement which provides mutual benefits.

During the past year, Dr. Edward T. Krementz, Dr. Rudolph J. Muelling and the Director of the Registry served on various committees to work toward establishing Uniform Definitions and Procedures for consistency in the accumulation of data, as well as special research studies. The following meetings were held between staff representatives of the participating registries and the Cancer Chemotherapy National Service Center:

August 1957 Committee on Research Untreated Cancer Cases—or the Natural Duration of Cancer

New York Medical College—Flower Fifth Ave. Hospitals. New York City

September 1957 Committee on Uniform Definitions and Uniform Code University of Chicago at Chicago, Illinois

March 1958 Ad Hoc Working Group on Revision of Uniform Punch Code and Neoplasms to be Reported University of Michigan, Ann Harbor, Michigan

April 1958 Sub-Committee on Malignancy and Neoplasms to be Reported Charity Hospital of La. at New Orleans, La.

May 1958 End Results Group—Clinical Studies Panel Bethesda, Maryland

By the close of the fiscal year a Uniform Punch Code had been developed through the cooperative efforts of the participating staffs, as well as an agreement on the tumors to be reported. A manual with definitions and instructions in detail is being prepared for release, possibly in August

### APPROVAL BY THE AMERICAN COLLEGE OF SURGEONS

In January 1957 the Registry was inspected by a representative of the American College of Surgeons and was again approved as part of the Cancer Program in this hospital.

#### ANNUAL MEETING TUMOR REGISTRY BOARD

This meeting was held in the Board Room of the Hospital on 2/12/55. A report on the activities and the accomplishments for the past year was given by the Chairman of the Board. Subsequently, minutes of the meetins were distributed to the Board Members.

### INFORMATION RELEASED FROM AND ABOUT THE REGISTRY

#### Published Material

"Third National Cancer Conference Proceedings" Published by J. B. Lippincott Co. 1957

"Report from the Tumor Registry, Charity Hospital of Louisiana at New Orleans, 1948-1955" May 1957

Journal of the Louisiana State Medical Society "Registry Data Reflects Gain in Lives Saved" May 1957 Louisiana Cancer Reporter

Newspaper coverage (AP) local, state and national, released by Mr. Pat McGrady, American Cancer Society, Inc. and based on information from the

statistical analysis of the Registry records. The statistical analysis was prepared by Mr. Abraham Ringel under the direction of B. Aubrey Schneider, ScD. of the national office of the American Cancer Society, New York.

"Cancer Scoreboard"—Cancer News—Summer 1957.
Published by American Cancer Society, Inc.

#### Visitors

Approximately 65 visitors have signed the Registry Guest Book. These have included persons from France, Scotland, Africa, various states and from the American College of Surgeons, the American Cancer Society and the National Cancer Institute.

#### Information on Organization and Operational Procedures

Copies of the Registry Handbook, sample forms, procedures, etc. have been requested and sent to sixteen hospitals in the state, eight hospitals in other states and one foreign country, Japan.

#### Information from Registry Records

Information of a general nature, such as copies of statistical data, reprints of articles, etc. have been distributed to the professional staff of the Hospital and Medical Schools. In addition, individual requests have included supplying information for special studies from the abstract and follow-up reports on case histories grouped together by the anatomical site of disease, or from the punch cards in electric machine accounting for statistics or identification of patient by subject matter. Information most frequently requested has been on pelvic tumors, lung, breast, pancreas, gall bladder, nasopharynx, melanoma and thyroid.

Indirectly the Registry has helped the doctors by having a carbon copy of the Registry abstract summary and record of follow-up information in the patient's hospital record. A number of doctors have commented on the value of this information as a ready summary at the time the patient is seen in the clinic or ward as well as upon reviewing hospital charts for special studies.

#### SERVICE TO PATIENTS

In the process of abstracting records on new cases of cancer, it has been noted that some patients fail to return for treatment following the diagnosis. In these instances, a memo is sent to the hospital Social Service Department to request aid in getting the patient in for treatment.

During the course of carrying out follow-up procedures upon contacting the patients who have failed to return to the hospital for check-up examinations, a number of patients have requested clinic appointments. Because of the importance of keeping the cancer patient under medical observation to detect early any recurrence of cancer, the Registry staff has taken the time to arrange such appointments.

#### PROGRESS OF WORK

It is gratifying to report that real progress was made this past year in bringing up-to-date the Registry records on cancer patients known to this hospital for the period 1948-1957. In addition to abstracting the new cases diagnosed in 1957, follow-up procedures were carried out on all previously reported living cases. As a result, these cases were classified as alive in 1957 or 1958, dead or lost. Through the ingenuity and perseverance of the staff, the lost cases now represent less than one-half of one percent of the

total cases. This record of accomplishment deserves particular attention not only because of the very fine work on the part of the staff but also because of the importance of having up-to-date information on all cases in computing survival rates for end results.

### PATIENTS TRACED TO OTHER STATES AND ABROAD

In the course of follow-up approximately 400 patients have been traced to thirty-eight states in this country and to five foreign countries. A map pinpointing these cases is on display in the Registry. This, together with the map of Louisiana pinpointing the number of patients by parish residence has been of particular interest to visitors.

### VOLUME OF CASES-STATISTICAL DATA

15,829 Registry records on cancer, 1948-57.

Information available from punch cards for the total case load provides, through the means of electric machine accounting, a periodic evaluation of the size and nature of the cancer problem in this hospital indicating gains or deficient areas in diagnosis and therapy for specific periods of time.

In the report "An evaluation of the Cancer Registry at Charity Hospital of Louisiana at New Orleans" prepared by Abraham Ringel of the Statistical Research Section, Medical and Scientific Department, American Cancer Society, Inc., February 1957, there is available in the Registry detailed statistical data from the Registry punch cards.

To illustrate the type of information available:

Distribution of cancer cases by race, sex and year of diagnosis.

Percent of cases microscopically confirmed by race and year of diagnosis.

Percent of cases microscopically confirmed by site.

Stage of disease at diagnosis by race and year of diagnosis.

Stage of disease at diagnosis by site.

Percentage distribution of cancer cases by sex and age.

Percent of female cancer cases by site.

Percent of male cancer cases by site.

Survival cancer cases by sex.

Survival cancer cases by race.

Survival cancer cases by stage at diagnosis.

Survival cancer cases by site.

### PLAN TO REVISE EXISTING REGISTRY CODE, FORMS, PROCEDURES

The decision to revise the Charity Hospital Registry code was prompted to a great extent by our participation in the Cancer Chemotherapy Program and to satisfy the increasing demands for more information from our own punch cards.

A survey is now being conducted among the professional staff of the Hospital, Medical Schools and others interested, in order to give these groups the opportunity of expression in terms of comments on the present Registry code, the Uniform Punch code and suggestions for any expansions to the combined codes.

We have solicited the aid of Dr. B. Aubrey Schneider and Mr. Abraham Ringel of the American Cancer Society, Inc., New York and William I. Lourie of the National Cancer Institute, Bethesda, Maryland in helping us with our

plans in revamping the Registry codes and procedures. A meeting with these statistical consultants has been scheduled during August in New Orleans.

#### CONCLUSION

The Tumor Registry, now with up-to-date records, is facing toward anticipated expansion and development in the coming year. We believe these changes will increase the effectiveness of the place of the Tumor Registry in the cancer program at this Hospital as well as on the national level.

Respectfully submitted,

/s/ MARION WOGAN, (Mrs.) Marion Wogan,
Director
Tumor Registry

# ANNUAL REPORT ELECTRON MICROSCOPE LABORATORY July 1, 1957 — June 30, 1958

Due to the absence of Dr. Low who is presently on Sabbatical leave in Europe visiting electron microscope laboratories this report is being given by Dr. Geer.

As of July 1957 the Radio Corporation of America had performed extensive repairs on the electronic circuits and lens systems of the microscope and there had been a general renovation of the laboratory involving new cabinets, pipe insulation, air conditioning repair, replacement of dark-room equipment, and purchase of an ultra-microtome. The total cost of this work was \$2,944.98 which was nearly \$2,000 less than anticipated.

After the Radio Corporation of America Service Company had completed their work on the microscope we were still plagued with constant vacuum and electronic system break-downs. This was in no way a reflection on the repair work that had been done but was rather the result of age and a period of disuse which preceded the repair work. Gradually through the skill and patience of Mr. Max Clevenger and Mr. Robert Druce these difficulties were overcome. The next problem was to bring the resolution of the instrument to the best possible value. This work was time consuming and tedious and required considerable knowledge and skill. Mr. Robert Druce who is employed by Louisiana State and Tulane Universities did this work at no cost to Charity Hospital as a part of his service to the three electron microscope laboratories and managed to bring the resolution of the instrument to fifteen Angstroms which is indeed an accomplishment since a new instrument guarantees only 30 Angstroms resolution. If we had been compelled to hire an electronic technician from The Radio Corporation of America the cost of this work at \$60 per day plus expenses would have been well over \$1,000.

At present there is a great variety of projects being actively pursued of planned. At L.S.U. Drs. McGill, Strong and Geer are conducting light and electron microscopic studies on kidney biopsies taken at Charity Hospital plus doing fundamental work on atherosclerosis and expermental hypertension. Dr. Clark at Tulane has been carrying on studies of the skin. There are two who are interested in studies on cancer at L.S.U. Dr. Dougherty has been investigating cervical carcinoma with the electron microscope and Mr. Mitchell in the department of Anatomy is formulating a study in the field of cancer. Drs. Melanie, Miller, and Swartzwelder at L.S.U. are continuing studies of Endameba histolytica with the electron microscope. Dr. Dietlein at Tulane is beginning an electron microscope study the exact nature of which I do not know. Dr. Newsome has previously conducted an electron microscopic investigation of hyaline membrane disease in the new-born and it is presumed that this will be continued now that the microscope is available. A part of the space in the microscope laboratory is presently being utilized by Dr. Newsome for the preparation of tissue sections for light microscopy.

At the present time the greatest deterrent to full use of the microscope is that some of the investigators who are using or planning use have no developed program for their work and are presently dependent on Mr. Clevenger for phases of their work. Mr. Clevenger is only a part-time employee of the laboratory (ten hours a week) and is rapidly becoming saturated with work While it is not and should not be intended that Charity Hospital furnish technical assistance for researchers in electron microscopy it is the function of the laboratory to give help to them until such a time as they can support

their own work. Mr. Clevenger is not only active in the maintenance of the microscope but also trains persons in the techniques of tissue fixation, embedding and sectioning for electron microscopy. At the present time it is not felt necessary to hire any additional help, but if the trend toward use of the instrument continues at the present pace by next year such will definitely be necessary.

Respectfully,

/s/ JACK C. GEER, Jack C. Geer, M.D.

In the general manufacturing laboratory, a total of 49,425 gallons were made. These included syrups, elixirs, liniments, lotions, mixtures and laboratory stains. 702 pounds of ointments and 2,246,000 tablets were also manufactured. Total cost of operation including bottles and labor was \$49,266.84. Had these same items been purchased, it is estimated the total cost would have been \$202,356.04.

In the solution room, 178,310 liters of sterile saline, dextrose, NaK, etc., were produced as well as 111,703 bottles of procaine, normal saline, and other sterile solutions of varying sizes and strengths. Total cost of operation including labor was \$63,053.54. Had these same solutions and ampules been purchased, it is estimated the total cost would have been \$192,218.02.

# ANNUAL REPORT COLLABORATIVE CHILD DEVELOPMENT PROGRAM January 1, 1958—June 30, 1958

The Collaborative Child Development Program was established January 1, 1958 by means of a research grant from the National Institutes of Health to Charity Hospital as the central organizing and administrative institution bringing together certain key personnel and departments of both LSU and Tulane schools of medicine. This program at Charity Hospital is one of thirteen similar programs in medical centers throughout the United States all engaged in similar studies. The specific aims of this National Collaborative Program include the production of conclusive evidences to clarify the etiology of such disorders as cerebral palsy, mental retardation, birth defects, prematurity and perinatal mortality and morbidity of allied interests. To help achieve these goals each of the collaborating institutions has been provided funds for development and support of the staff and facilities necessary to carry out and record detailed observations on a group of selected women during pregnancy, labor, and delivery; and thereafter to make pertinent observations on the resulting infants until the age of six or seven years. All observations are to be recorded by our staff on standard forms provided us so that the information collected from all collaborating centers may be pooled for analysis at the Collaborative Program facility in the National Institutes of Health.

The administrative authority of the Collaborative Program stems from the Advisory Board consisting of the Director of Charity Hospital, the Dean of LSU School of Medicine, and the Dean of Tulane School of Medicine. Active administration of the program is delegated to the Project Director as Chairman of the Committee of Principal Investigators consisting of the following personnel: the Department Heads of Obstetrics and Pediatrics at Tulane School of Medicine, the Department Heads of Obstetrics, Pediatrics, Neurology, and Psychology at LSU School of Medicine and the Director of the Department of Anesthesia at Charity Hospital. The Assistant Clinical Director of Charity Hospital serves as an active consultant to the Committee of Principal Investigators.

Considerable administrative planning has been accomplished during the past six months to provide for the employment and orientation of professional and non-professional to carry out this work. During the six months it has been possible to employ a psychologist, a pediatrician, and a nutritionist on the professional staff to begin some of our initial work Secretarial and clerical assistance has been obtained to provide some of the essential information about our perinatal problems at Charity Hospital to allow for productive planning of our future activities. Table attached illustrates the total obstetrical and pediatric experiences related to the perinatal period at Charity Hospital during the last fiscal year.

To our knowledge, this tabulation represents the first such listing of total perinatal experiences in Charity Hospital and was collected from a number of valid sources including the delivery room records, the term nursery records, and records of the Pathology Department and Premature Infant Care Program.

Providing that similar tabulations can be compiled during the coming years, it may be of some significance to compare such figures as the incidence of prematurity among white patients of 8.7% compared with 13.25 among Negro patients. The over-all hospital perinatal mortality rate of

5.2% is one which collaborators in this program are striving to lower significantly. This 5.2% hospital perinatal mortality rate reflects the number of women coming to Charity Hospital for delivery who lose their baby before, during, or in the several days following delivery; thus it is also referred to as a percent of pregnancy wastage. In this case however, not including the presumably high number of miscarriages prior to hospital admission.

Respectfully submitted,

WILLIAM T. NEWSOM, M.D. Project Director Collaborative Child Development Program

# ANNUAL REPORT MEDICAL SOCIAL SERVICE DEPARTMENT

July 1, 1957 to June 30, 1958

This department provides services to the hospital patient who has problems of a social nature which are complicating factors in his illness, and which interfere with or retard his response to medical or psychiatric care. The types of problems vary in complexity and seriousness, from simple which are readily resolved to those which require frequent contacts over long periods of time. Depending upon the circumstances, work may be directly with the patient and his family; in many, however, other social agencies in the community are involved. Each case is considered on an individual basis, from the point of view of the nature of the problem, the ability of the patient and his family to handle it, ond of resources outside the family which may be brought into use. In each, the objective is to help the patient of find some solution to the problem, or at least to make the best possible adjustment to it. Such a solution might lie in helping with personal or family adjustments, or in material help through resources within the department, or through cooperation with another social agency. With such help, the patient is able to make fuller use of the medical care offered by the hospital. As a result, he and his family may be enabled to make a speedier return to a more productive and satisfying life. In many instances, the removal of obstacles to treatment will mean that the course of the patient's treatment will be shorter and smoother, permitting more rapid turnover of patients, and promoting more effective patient care.

# Services to Patients

Altogether 40,613 patients were given help through this department. This represents an increase of 3,293 over the preceding year. Of the total number of patients served, a permanent record was kept for 9,587 patients (an increase of 1329 over the previous year. The decision as to whether a permanent record will be made depends upon individual case situation. In many instances, where a brief service is given, and it is not anticipated that further assistance will be needed, or where the information collected about the patient is not considered to be of future value should the patient return to the hospital at a later date, it is not considered to be economical to keep a permanent record. In the instances in which continued help over longer periods of time is needed, a recorded narrative of the findings, of the worker's evaluation of the situation, and of the steps taken to relieve it are an essential part of the helping process. The fact that there was a proportionately larger increase in the number of recorded cases may be taken as a general indication of an improvement in the quality of work, since the cases which are recorded tend to be the ones in which more thorough study, evaluation and treatment are given.

With the recognition that statistics alone cannot accurately reflect either the quality or the exact volume of work in this field, the following figures are given to indicate some of the types of tangible services given patients, and the number of contacts required to complete the service.

Areas of Casework Service	Patients Served	Contacts with or in behalf of patients
Nursing care in the home	542	716
Child Placement	367	531
Placement in nursing home	843	1248
Financial asistance	1311	1423
Homemaker service	41	58
Vocational rehabilitation	207	321
Shelter Home Care	114	148
Appliances and Medication	1891	2207
Transportation	312	401
Hospitalization & other medical procedure Interpretation & planning with personnel of	511	607
facility re.: patient's social situation	771	911
Interpretation of patient's medical-social		
situation to other agency	671	895
Interpretation to patient group	721	907
Unmarried mothers served	48	112

Another type of service is more directly related to facilitating medical plans for patients. In this category is included securing social histories to aid in diagnosis, home studies preparatory to discharge, and intake interviews for the purpose of screening patients for acceptance in the psychiatry clinics.

Referrals for service are encouraged from hospital staff, and during the current year accounted for 13,076 of the total number of patients brought to the attention of the social workers. Other sources of referral were: Department of Public Welfare (3,389), other agencies in the community (2,160). In 21,988 cases the patient applied independently for help, or his need was pointed out by a member of his family, his employer, clergyman, or other interested individual.

Geographically, the patients seen in Social Service are distributed throughout the State, but as would be expected the largest number is concentrated in Orleans Parish. A total of 22,126 patients came from this parish, while 18,011 were from other parishes throughout the State. In addition to these, 476 patients from other states were served, since Charity Hospital does render some emergency treatment to non-residents.

# Use of Funds

The department has at its disposal several funds which can be used to meet the emergency needs of patients. The amount of money available is small, and therefore only urgent, short term needs can be met. In instances in which a patient needs financial aid over longer periods of time, or in which a large amount of money is involved, the patient is referred to the appropriate agency in the community. The funds used by the department, except for the Patients' Welfare Fund and the Insulin Fund, are from special bequests, or from private donations. The amounts of money available from each fund is listed below.

Fund	Amount
Stauffer-Eastwick	\$ 4.800.00
Patients Welfare	1.200.00
Weil Convalescent	360.00
Insulin Fund	4.800.00
American Cancer Society	. 1,156.06
Special Donations	. 112.00
Total	

The largest demand for expenditures from these funds was for medication. Although no definitive study of this problem has been made, it seems obvious that there is a large unmet need in this area. The problem is growing more acute as more and more patients are being treated on an out-patient basis, and as the cost of the drugs is so high. The following table shows the numbers of patients helped through the use of the funds available to the department.

	No. of Patients	Amount
Medication	7384	\$ 8,310.25
Transportation	494	801.00
Maintenance	26	148.50
Appliances	371	1,561.90
Total	8275	\$10,821.65

The total amount of money available was not expended because there are restrictions on the use of some of the funds. For example, the largest one, Stauffer-Eastwick Fund, can be used for white patients only, and many of the private donations are specifically for children.

# Eligibility Determination

The unit of the Social Service Department which is responsible for screening patients for eligibility consists of nine interviewers, and is administered by one of the case work supervisors. With this number of workers it is impossible even to approximate complete coverage of all of the patients applying for treatment in wards, clinics and accident rooms. Altogether 13% of the total number of patients were interviewed. The following shows the number of patients interviewed, according to service, and the number of patients found to be ineligible:

	Number	Number
Clinics	3,102	1,681
Wards	5,858	739
Accident Rooms	20,551	4,693
Total	29,511	7,113

#### Staff

The department, when fully staffed, consists of 56 workers: a director, 6 supervisors, 10 senior medical social workers, 13 beginning medical social workers, 4 senior psychiatric social workers, 4 beginning psychiatric social workers, 1 clerical supervisor, and 13 clerical workers. In the professional staff there has been an average of 11 vacancies. There were 9 resignations and 8 replacements during the year, but some positions remained vacant. In the clerical staff one position has remained vacant, while there were 5 resignations and 5 replacements. The high proportion of turnover and vacancies has limited the amount and quality of work performed, but as in previous years the shortage of qualified personnel and the comparatively low salary scales has made it impossible to maintain a full staff.

# ANNUAL REPORT MEDICAL AND PATIENTS' LIBRARY July 1, 1957 to June 30, 1958

## Staff

The regular library staff appreciated the help of a total of fourteen volunteers who gave one hundred and thirteen hours and a half on the wards with the book truck.

# Reading Room Activities

The attendance in the library remained high. The library benefited by the special donation of a series of Audio-Digest Tapes with medical lectures of various fields. It was given by the Schering Corporation. The series will be valued at one thousand dollars when complete. The tape recorder was suggested by Dr. A. A. Flores and approved by the Medical Committee to be bought with money from the Henderson Fund. A room formerly used to repair books in, is used by the staff as a private room to listen to the medical lectures.

The medical and professional staff enjoy the library very much. They relax with a popular book or scan the many magazines for recreation. They come in to study the medical journals or books. The doctors are assisted in every way.

# Ward Rounds

Daily ward rounds to help the patients' morale are made. Books and magazines are carefully selected before being circulated on the wards. Volunteers are trained before being sent out alone with the book truck. The library staff goes daily around and is given cooperation with the many various services on the ward. The chaplains, Sisters, nurses and many others are all willing to help.

# Donations

All magazines and paper back books and many of the regular bound books are donated which are used on the ward. Professional and medical staff members, personnel of this hospital, church groups, clubs, individuals and business firms have brought magazines and books to the library as gifts. Some have contributed for years. There is no public appeal yet the library is always well supplied. All help to make the library a success. The majority of donations come from the New Orleans area but people from the other parishes send in magazines or books by mail or by automobiles.

## Statistics

VOLUNTEERS	
Ward Reading Room	7,809 9,700
Attendance	17,509 35,112
Purchase	125 328

Lily E. Twining, Librarian

# ANNUAL REPORT STORE ROOM DEPARTMENT July 1, 1957 — June 30, 1958

During the past year an additional Stock Clerk I has been added to our staff to keep a perpetual inventory of all stocks received and issued.

A new electric lift delivery truck has been purchased for this department in addition to the old electric truck being overhauled. This has helped expedite deliveries to the main and outlying buildings greatly.

This is the third year whereby a certificate from the United States Department of Agriculture or a Louisiana Department of Agriculture must accompany all shipments such as eggs, fresh meats, fruits, vegetables and staple grocery commodities, as to guarantee of grade purchased by the hospital.

Respectfully submitted,

/s/ LAWRENCE R. McNAMARA,
Lawrence R. McNamara,
Stock Clerk IV

# ANNUAL REPORT ACCOMPLISHMENTS MAINTENANCE DEPARTMENT July 1, 1957 to June 30, 1958

# **JULY 1957**

Installed elements in traps, Dibert Building.
Renewed ice-water chiller, Student Nurses' Home.
Repacked expansion joints on heating system, Std. Nurses' Home.
Painted Doctors' Dining Room, Basement of Main Building.
Painted Heart Station, 5th Floor of Main Building.
Replaced 24 metal sash windows in Laundry.
Built 9 wooden cabinets for Dr. Newsome of Premature Unit.
Built 24 wooden stools, Colored Admitting Room.
Installed 10 new Formica tops on tables, Nurses' Dining Room.
Installed 20 de water outlet on Lab. table, Virus Laboratory.
Installed new hopper bowls on 4th, 6th and 8th Floors.
Installed new shower pan in ward C-804 of Main Building.
Installed 2 new shower pans in ward C-305A of Main Building.
Constructed 5 metal frames for narcotic boxes, 7th Floor.
Constructed 30 metal infusion stands, Emergency Department.
Constructed 60 wire handles for Housekeeping Department.

And usual routine of repairs and replacements as called for on requisitions. Total amount of requisitions for July: 1421.

## AUGUST 1957

Renewed 8" hot water line to heater, Powerhouse.
Renewed 4" hot water line to heater, Powerhouse.
Installed drinking fountain in ward C-300A in Main Building.
Constructed metal Utility Table for Housekeeping Department.
Constructed metal table for 3" casters, Outpatients' Department.
Constructed 6 metal T.V. tables with 3" casters, Dibert Building.
Constructed 3 metal tables with 3" casters, Radiology 7th Floor.
Built 2 wooden cabinets for Dr. Fisher, Pathology Department.
Built 1 wooden desk for Sr. Clarisse in Housekeeping Department.
Built 1 small wooden desk, Dr. Flores' Office 9th Floor.
Built 2 wooden lockers in White and Colored Admitting Rooms.
Installed acoustic ceiling in Dr. Flores' Office 9th Floor.
Installed Formica top on 2 tables, 3rd Floor of Main Building.
Installed Formica top on table for Record Library.
Installed Formica tops on 2 tables for Housekeeping Department.
Painted Bldg. Maintenance Superintendent's Office.

And usual routine for repairs and replacements as called for on requisitions. Total amount of requisitions for August: 1657.

### SEPTEMBER 1957

Removed hand basin from corridor, 4th Floor Colored T. B. Building. Painted Basement of Polio Unit.

Painted Nurses' Dining Room, Basement of Main Building.
Removed blanks and packed same in steam line, Main Building.
Removed blanks and packed same in steam line, Student Nurses' Home-Repaired 6" broken steam line in Valve Room, Main Building.
Renewed 2" steam pipe in Valve Room, Main Building.
Renewed 2" steam line gaskets in East Wing, Main Building.

Renewed discs in 1" steam valve, West Wing of Main Building. Renewed steam trap and valve under Boiler Room, Powerhouse. Renewed ½" valve on steam line in Boiler Room, Powerhouse. Installed water valves for developing tank, Heart Station. Installed developing tank and lead line, Heart Station. Installed waste line for refrigerator, 11th Floor Center. Repaired broken water line behind marble wall in ward W-1104. Installed water line for A. C. tower in Basement of Polio Unit. Built large wooden cabinet for Sr. Patricia, 12th Floor. Built large wooden cabinet for Sr. Theresa, Dietary Department. Built steps and railing for 264/266 Walnut Street property.

And usual routine for repairs and replacements as called for on requisitions. Total amount of requisitions for September: 1513.

#### OCTOBER 1957

Re-built Brick stack of Incinerator, rear of Warehouse. Installed ice-cube machine, Dibert Building, 3rd Floor. Installed three new burners in Incinerator. Rerouted 4" vent line in Incinerator. Installed 5" valve on hot water line in trench by Isolation Bldg. Installed rinse valve on dish machine, Main Kitchen. Installed heating system in Hot House, rear of Std. Nurses' Home. Installed 6 new expansion joints in steam trench, Sisters' Home. Built "L" shaped cabinet for Sr. Patricia 12th Floor. Built large work table for Auto-Garage. Built large bookcase for Purchasing Department. Built wooden desk for Housekeeping Department. Constructed metal table with shelves, Anesthesia Department. Installed electric wire, etc. in Pathology Department. Installed receptacles and cables in X-Ray Department 7th Floor. Painted exterior of 264/266 Walnut Street property. Painted Living Rooms and Dining Room, Sisters' Home.

And usual routine of repairs and replacements as called for on requisitions. Total amount of requisitions for October: 1802.

# NOVEMBER 1957

Repaired 6 treatment tables for Housekeeping Department. Repaired flat work ironer, Laundry. Installed 7 fluorescent fixtures in Miss Mariano's Office. Installed new operating lights, 12th Floor.
Installed 220V outlet in Valve Room, Basement of Main Building. Installed 5 lavatories, 1st Floor Clinic White Side. Installed 4 Developing Tanks, 1st Floor Accident Room. Installed 1 Developing Tank, 1st Floor Colored T. B. Building. Installed ice-water machine, 1st Floor Colored T. B. Building. Installed waste line for refrigerator, 9th Floor Colored side. Removed plumbing fixtures from garage at 264/266 Walnut St. property. Built radio cabinet with casters, 3rd Floor of Main Building. Built 5 wooden benches for Emergency Unit 1st Floor Main Building. Installed Formica tops on 6 tables for Record Library. Built 2 glass enclosed Bulletin Boards, 11th Floor Main Building. Installed 1" hot water line from heater to compressor, Powerhouse. Installed 6" discharge line from Sump Pump, Powerhouse. Installed 1" regular steam valve on Sterilizer, Dibert Building.

And usual routine of repairs and replacement as called for on requisitions. Total amount of requisitions for November: 1801.

# DECEMBER 1957

Painted Sr. Urban's Office, Student Nurses' Home 1st Floor.
Painted 2 Date Rooms, Student Nurses' Home 1st Floor.
Painted Mrs. A. Muldrey's office, Student Nurses' Home 1st Floor.
Installed new Operating Lights, 12th Floor of Main Building.
Installed new Operating Lights, 10th Floor of Main Building.
Installed electric wire, etc. in Emergency Room, Main Building.
Installed ice crushing machine, 3rd Floor of Main Building.
Constructed wooden desk with Formica top, Dibert Building.
Constructed 1 Ampule Cabinet for Emergency Room, 1st Floor.
Erected 8 metal dressing carts, 12th Floor Central Service.
Erected metal truck for Heart Station.
Repaired broken steam line in attic of Observation Room.
Repaired sewer line in basement of Main Building.
Repaired 4" drain line and 4" soil line in Powerhouse.
Blanked main steam line in boiler, Powerhouse.
Blanked feed water lines to boiler, Powerhouse.
Installed new float valve in Powerhouse.

And usual routine of repairs and replacements as called for on requisitions. Total amount of requisitions for December: 1453.

# JANUARY 1958

Painted Assembly Room, Student Nurses' Home. Installed electric wiring in Colored Food Service, Basement of Ma Installed wiring, pipe and phone lines in Compensation Office. Installed wiring for signal lights, 3rd and 4th Floors Colored T. B. Bld Painted new Insurance Office on 1st Floor of Main Building. Installed 6" air chamber for hot water line, trench at Colored T. B. Blds Installed 2" air chamber for hot water line, trench at Colored T. B. Bldf Installed new lines on ice water chiller, Student Nurses' Home. Installed dish washing machine, Colored employees' Dining Room. Installed new developing tank, X-Ray 1st Floor Center of Main Building Installed 4" hot water valve in basement of Main Building.
Installed 2" hot water return valve, Student Nurses' Home. Installed 4" hot water valve in trench at Isolation Building. Installed pipe railing for stairs, 2nd floor of Colored T. B. Building. Constructed metal counter 2' x 8' for Colored Food Service. Installed new cement flooring in Garbage Room, Basement of Main Blds Installed new partition (lead) in X-Ray Colored side 1st Floor Main Bld

And usual routine of repairs and replacements as called for on requisitions. Total amount of requisitions for January: 1858.

# FEBRUARY 1958

Painted Delivery Room, 10th Floor of Main Building.
Installed receptacles and cable in attic of Main Building.
Painted Main Kitchen, Basement of Main Building.
Installed necessary wiring, etc. in X-Ray Room, 1st Floor Main Bldg.
Installed necessary wiring, etc. for X-Ray machine, Dibert Bldg.
Painted Colored Food Service, Basement of Main Building.
Removed electric wire and fixtures for contractor on 7th Floor.
Removed old and installed new Golden Anderson valve, Powerhouse.
Installed pilot light line to new Golden Anderson valve, Powerhouse.
Removed steam lines to bedpan sterilizer, Wards C-702 and C-703.

Constructed metal scaffold with rollers, Paint Shop. Built wooden cabinet for Medical and Surgical Office.

And usual routine of repairs and replacements as called for on requisitions. Total amount of requisitions for February: 1525.

## **MARCH 1958**

Painted Admission Bath, Basement of Main Building.
Painted White and Colored Admitting Rooms, 1st Floor of Main Bldg.
Painted Post Office, 1st Floor of Main Building.
Installed new wiring for X-Ray equipment, Contagious Building.
Replaced night lights on 10th Floor of Main Building.
Installed buzzer system in Prof. Students' Home.
Lowered ceiling lights on 3rd Floor of Main Building.
Installed 7 new steam kettles in Main Kitchen.
Installed 7 new steam kettles in Main Kitchen.
Installed 1 cold water lines for hose faucet, 1st Floor A. C. Unit.
Installed 1 cold water line for hose faucet, 12th Floor A. C. Unit.
Installed 1 cold water line for A. C. Unit, 6th Floor of Main Building.
Constructed 13 metal window grilles for Colored Food Cervice.
Constructed 2 dressing booths, X-Ray Department White Clinic.
Erected partition in X-Ray on 1st Floor of Main Building.

And usual routine of repairs and replacements as called for on requisitions. Total amount of requisitions for March: 1802.

## APRIL 1958

Removed waste and vent lines, White and Colored T. B. Bldg.
Removed plumbing fixtures and capped lines in wall, W & C T. B. Bldg.
Installed two developing tanks, Heart Station, 5th Floor.
Installed mixing valve for Whirlpool, Polio Unit.
Installed new electric cables in attic of Main Building.
Removed 4 steam lines on 7th Floor of Main Building.
Removed 4 return valves on 7th Floor of Main Building.
Removed sterilizers on 2nd and 3rd Floors of White and Colored T. B. Bldg.
Painted interior of Ambulance Drivers' Quarters.
Erected stands for Bazaar, Student Nurses' Home grounds.
Constructed 2 desks for Diagnostic Radiology Department.
Erected metal table for portable compressor, Outpatients' Dept.
Installed new developing tank, 1st Floor Dibert Building.

And usual routine of repairs and replacements as called for on requisitions. Total amount of requisitions for April: 1623.

## MAY 1958

Rewired and installed switch and lights, Guard House in Parking Lot. Remove and re-vamped two 6" fire lines on 7th Floor Main Building. Installed conduit, pipe and cable on 2nd and 3rd Floors in Dibert Bldg. Installed outlets and wire in Dark Room, X-Ray Dibert Bldg. Prefabricated 3" soft water line, Powerhouse roof.

Installed new plumbing fixtures, 2nd Floor White and Colored T. B. Bldg. Repaired two (2) Freeon Compressors, Equipment Room.

Re-routed electrical lines for A. C. Unit in Room 507 EBDM Bldg. Painted Employees' Dressing Room in Laundry.

Installed 5" expansion joint on steam line, trench at Sisters' Home.

Installed electric pump in trench at Student Nurses' Home.

Installed rollers and guides for steam line, trench at Sisters' Home.

And usual routine of repairs and replacements as called for on requisitions. Total amount of requisitions for May: 1580.

# **JUNE 1958**

Overhauled dish machine in Isolation Building.
Overhauled dish machine in Dibert Building.
Repaired 23 valves for heating system, Main Building.
Rewired "Exit" lights on 1st floor of White and Colored T. B. Bldg.
Installed rollers and guides for lines in steam trench.
Renewed and packed valves in Laundry.
Removed 11 radiators on 2nd and 3rd Floor White and Colored T. B. Blds.
Renewed 4" drain line from heaters, Powerhouse.
Installed 3" soft water line, Powerhouse.
Painted X-Ray Dept., Dibert Bldg.
Built partitions on 2nd and 3rd Floor of White and Colored T. B. Blds.
Built partitions on 2nd and 3rd Floor, White and Colored T. B. Bldg.
Constructed 3 large wooden cabinets, White and Colored T. B. Bldg.
Built 2 black boards for White and Colored T. B. Bldg.
Built 4 Bulletin Boards, White and Colored T. B. Bldg.
Constructed 12 new doors, White and Colored T. B. Bldg.
Built 6 medicine cabinets, White and Colored T. B. Bldg.
Built 6 medicine cabinets, White and Colored T. B. Bldg.
Constructed metal railing for Physical Therapy.

And usual routine of repairs and replacements as called for on requisitions. Total amount of requisitions for June: 1394.

IN SECURIT OF SHAREST PARTY AND PROPERTY BELLEY

# ANNUAL REPORT ENGINEERING DEPARTMENT July 1, 1957 — June 30, 1958

**JULY 1957** 

Repaired governor on No. 1 hot water pump, repairs consist of a new diaphragm, all new fittings and resetting. Put 100 lb. Keg of Sanabrite chemical in air condition cooling tower on roof of Power House to prevent algae. Put 300 lbs. of anhydrous ammonia in Ice Plant system, repaired No. 2 electric motor driven boiler feed water pump, metalized shaft, trued same on bearing ends of shaft, replaced all bearings with new bearing ends of shaft, replaced all bearings. Installed Klackson horn on cooling tower fans on ice water and ice plant system for safety warning conditions. Repairs were made on the No. 1 Frick Freon Compressor in Equipment Engine Room in the Main Building that refrigerates the storage boxes and milk rooms, reseated all valves and packed same. Repaired motor and checked bearings on condensate pump in Student Nurses' Home. Ran Murray Turbo Generator semi-monthly without load 28" Vacuum Ok.

# AUGUST 1957

Repaired automatic air purger on the No. 1 Worthington Freon Compressor in Power House, repaired pully on chemical pump, rebored and made bushing to fit same. Shut down plant for repairs, repaired broken drain line under the banquette on Freret Street side of Power House, packed steam valves on the top of No. 2 boiler, cleaned No. 2 cooling tower controlling cool water for the Ice Plant and Ice Water system, changed oil cooler with emergency spare cooler, changed old used oil with new clean oil in the No. 2 Worthington Centrifugal Freon Air Condition Compressor. Repaired Vilter Ammonia Compressor in the Ice Plant, repairs consist of metalized and trued bearings on the 5" excentric crank shaft, replaced all bearings, main bearings, out board bearings, connecting rod bearings, new piston pin bushing and pins, new safety head assembly and valves, new piston compression and oil rings, new conductor rings and contact points, new carbon brushes for synchronious motor. Compressor completed, operating ok. Repaired electrical controls on both No. 1 and No. 2 air compressors. Repaired two ice cube units in Dibert Building. Repaired sump pump in Engine Room in the Student Nurses' Home. Repaired sump pump in Power House, installed new bearings and cleaned strainers. Ran Murray Turbo Generator semi-monthly without load Vacuum 28" Ok.

#### SEPTEMBER 1957

Repaired condensor pumps for ice water system on Mezzanine Floor in Power House, removed old deteriorated ice water unit from the Engine Room in Student Nurses' Home preparing to install new unit when it arrives. On the date of 9/16/57 Mr. Denz representing the Murray Turbine Corporation started to survey and make necessary repairs on the 1000 K.W. Murray Turbine Generator with the assistance of the employees in the Power House, parts were ordered through the Equitable Equipment Co. Distributors, repairs and material consist of replacing carbon springs, crabon rings, carbon stops, governor spring sleeve bearings, governor shaft thrust bearings, governor shaft bearings, cleaned condensor, changed oil 100 gallon capacity, repairs were completed on the date of 10/1/57, ran and tested turbine, repairs satisfactory, 28" Vacuum. Hand hole and man hole plates were removed from No. 1 boiler so repairs could be made to same. Contract was awarded to Thos. Hooley & Sons Contractors to remove all old tubes, replaced with new

tubes, calked stay bolts interior and exterior, install new baffle walls and baffle tiles, scale interior and exterior of the drum and tube sheets. These necessary repairs were recommended by the insurance boiler inspector because of age and service of the boiler. Installed a new temperature control switch in walk-in cooler in the Contagious Building.

# OCTOBER 1957

Repaired York tube ice machine in Dibert Building, installed electrical unit for electric welding machine in Power House. Installed new interior mechanism in Armstrong low pressure trap connected to the Laundry Heater replaced drain lines on hot water and feed water pumps. Put 100 lb. keg of Sanabrite chemical in cooling tower on roof of Power House to prevent algae 300 lbs. of anhydrous ammonia in Ice Plant system, repaired Mason Neilam gas regulator on No. 1 boiler, put in a new diaphragm and general overhauling, repaired governor on No. 2 hot water pump, rebored fly wheel on No. 1 Frick Freon refrigeration compressor, made and installed new bushing to fit shaft, fly wheel was very loose, repaired 3" and 4" valves on line leading from brine tank to laundry water softeners, packed stuffing boxes on condensate return pumps in tunnel of Main Building to Power House, installed copper tubing line from main air line to unit that controls unit controls of Worthington Centrifugal Air Condition units, this line will be used only for emergency use, or when repairs are made on the Brunner Air Compressor that is permanently used to compress air. Ran Murray Turbo Generator semi-monthly without load 28" Vacuum Ok.

# NOVEMBER 1957

Installed 2-1" ammonia expansion valves and renewed extra heavy piping from valves to coolers on the ice water system in Power House that refrigerates water for x-ray and drinking water purposes, packed stuffing boxes on condensate pumps in Student Nurses Home, repaired all valves on No. 1 boiler while boiler was under repairs, repaired ice dump and ice car filler in ice plant, cleaned water filter in ice plant, removed all gravel, cleaned thoroughly and replaced same, repaired chemical pumps that delivers chemical to boiler. On the date of 11/26/57 a Mr. Grey, representing the Worthington Corporation started inspection on the No. 2 Worthington 500 H.P. Frees Compressor with the aid of the employees in Power House, repairs comsisting of replacing leaking shaft seal with new seal, replaced thrust bearing with new bearing, both bearings were the property of the Hospital, put 28 lbs. of Freon eleven in system, put new oil in gear box and main sump installed new purge unit compressor, cleaned all oil lines, greased coupling compressor ran 2 or 3 days over the week end, stopped manually because of cold atmospheric weather conditions, when atmospheric weather change to warm tried to start the compressor, it would run 3 or 4 minutes, lone enough to suck in air on the seal, build up head pressure and kick off, this is the problem why the seal was changed, A. M. Lockett, the Worthington Distributors will have to rectify these conditions. Repaired and installed valve plates on both small air compressors. Ran Murray Turbine Generates without load 28" vacuum OK.

# DECEMBER 1957

Replaced six hundred and thirty hand hole round and pear shaped gaskets on front and back of No. 1 boiler, after repairs were completed by Thos Hooley Contractors, the No. 1 boiler was tested with 200 lbs. hydrostatic presure by the Travelers Insurance inspector, repairs were successful of 12/18/57. Shut down plant to bank all valves on the No. 4 boiler, this was a necessity, received word that the boiler purchased by the Hospital to replace the old No. 4 boiler was to be delivered sooner than date perviously

notified. Shut down the Central Air Condition system, cleaned cooling tower on roof of Power House, scaled and painted the four water softeners. Southern Scrap subcontracted by the Rittner Engineering Company started to demolish the old No. 4 boiler. Shut down plant to install a float valve on the new boiler deaerating feed water heater, the float valve on the heater when heater was purchased was too small to control water level in heater, installed prefabricated 4" feed water line leading from heater to pumps, installed 6" drain line in basement of Power House replacing deteriorated lines. Repaired circulating ice water pumps that delivers ice water to Main Building for x-ray and drinking water purposes, repaired city water pumps in Equipment Engine Room in Main Building. Ran Murray Turbo Generator semi-monthly without load 28" Vacuum, OK.

# JANUARY 1958

Repaired sump pump in Power House, cleaned and painted boilers No. 1. No. 2 and No. 6. Southern Scrap completed demolishing No. 4 boiler. The power house door frame leading to the Freret Street entrance was slightly damaged, repairs will be taken care of by the Insurance Company. Replaced control switch box and wiring for the No. 2 electric driven boiler feed water pump, replaced burnt wiring in the switch box for the No. 1 electric driven feed water pump, both boxes got wet from a bursting hot water line above the boxes causing the conditions. Put No. 1 boiler in service, everything ok, took No. 5 boiler out of service for general cleaning, removed old packing from stuffing box on the Vilter Ammonia Compressor in the Ice Plant, replaced with new packing recommended by the factory representative, repaired bearings on motor for condensate return pump, replaced old oil with new oil on units in fan room on the 12th floor East and West side for the new air condition system, also steam cleaned the coils, removed section of deteriorating ammonia piping in the ice plant, replaced with new extra heavy pipe, cleaned interior of No. 5 boiler, repaired high and low safety whistles on the water column. Ran Murray Turbo Generator semi-monthly without load 28" Vacuum OK.

# FEBRUARY 1958

Completed installation of the 5 ton-heat-X-Model drinking ice water Freon system in Engine Room at the Student Nurses Home that furnishes cool drinking water throughout the building, unit operating satisfactory repaired York Ice Cube Machine on the 3rd Floor Dibert T.B. Building, repacked both condensor pumps for the ice water system, replaced deteriorated stuffing box glands with new brass glands.

On the date of 2/11/58 Mr. Whalen representing the Worthington Corporation inspected the No. 2 and No. 1 Worthington Freon 500 ton each compressors in the Power House with the aid of the Engineering Employees, leaks were found in the shaft seal and cover of the oil return float gasket reset, both leaks were repaired on the No. 1 compressor, both heads were removed from the condensor, the tubes were punched and cleaned, both ends, box end and rear end and heads were cleaned and painted interior with Debecot a rust preventative, linement and equipment was checked satisfactory. Received material for the installation of the No. 4 boiler, Thomas Hooley Contractors subcontracted with Rittner Engineering Company for the installation of the No. 4 boiler, installation started on the date of 2/17/58, removed heads from both ends of the condensors of the No. 2 Worthington Air Condition Compressor, cleaned tubes and heads thoroughly and painted box end and heads with Debecote a rust preventative. Ran Murray Generator without load, Vacuum 28" OK.

#### **MARCH 1958**

Shut down plant for repairs, installed 2-3" gate valves on the line leading to the return water tank of roof of Power House, installed a 3" plus control valve that controls pressure on hot water line between make up line and line delivering hot water to the outlying building, installed 3 leaking valve on discharge line of electric driven feed water pump so repairs can be made during day work, replaced gaskets on three steam valves on high pressure line leading to pump, installed fabricated 1" copper tubing connecting the Golden Anderson valve on make up tank on roof of Power House to connecting valve on Mezzanine Floor. Repaired motor on exhaust fan for center sterilizing room on 12th floor Main Building, removed old packing with new packing in stuffing box on No. 1 ammonia compressor on the ice water system, flushed and filled the chill water from the new air condition system three different times until the water cleared. Repaired No. 1 condensor pump for the air condition system, removed old seals, replaced with new seals, repaired drain lines, repaired No. 1 circulating chill water pump, replaced worn bearings with new bearings, replaced leaking seals, relined pump and motor which moved from linement causing bearing to wear, cleaned oil coolers and non condensable purge units on both Worthington Air Condition Freon Compressors in the Power House. Repaired both blow down valves on the No. 2 boiler. Put 300 lbs. of anhydrous ammonia in the ice plant. Ran Murray Turbo Generator semi-monthly without load, Vacuum 28" OK.

# APRIL 1958

Repaired pressure reducing valve on the 10th floor delivery room air condition system. Repaired armature on the exciter for the ice water system, turned down the commutator, installed new carbon brushes, repaired York V.W. Ammonia Compressor in the ice plant, installed new shaft see and general check up, replaced old lubricating oil in base with new of cleaned both Laundry and boiler water softener brine tanks, cleaned sand from gravel, added 3 yards of %" gravel in tanks. James F. O'Neil Construction Company started to dismatle the deteriorated deareating Cochrane hot water heater, preparing for the installation replacement of the new Cochrane heater on the Mezzanine Floor in Power House. Repaired the No. 1 large Frick Freon refrigerator compressor in the Engine Room in the Main Building, repairs consist of installing new piston compression and of rings, new piston pins and bushings, new suction and discharge valves crank shaft eccentric pins were trued and bearings spotted. Newman Electric Company installed 100 amp. switch in panel board controlling fans of cooling tower for the ice plant, replacing 70 amp. switch which was too small to carry the load, switch was received and installed without cost to the Hospital because of installation error. Repaired electric hoist crane in the ice plant, replaced broken spring and repaired clutch plate. Rass Murray Turbo Generator semi-monthly during the month without load Vacuum 28" OK.

## MAY 1958

Repaired York ice cube machine in Polio Building, fabricating 3" piping to tie in the line from the water softeners that leads to the hot water heaters this will eliminate taking water from the heaters for make at water to boilers, which will be taken direct from the softeners preventing fluctuation on pressure to the main and surrounding buildings. Put new motor starter on the air condition unit controlling the 5th floor Heart Station, cleaned the air condition units and controls that controls humidity on the 9th floor Premature Ward. Repaired circulating brine pumps that delivers brine from brine tanks to the ice storage room in the ice plant. Repaired sump pump in Equipment Room in Main Building, replaced bearings

and copper float. Repaired Mason Neillon gas regulator on the No. 5 boiler, replaced sleeve valve and cleaned thoroughly the interior of the regulator. Repaired several 3" and 4" steam valves that were removed because of leakage, replaced old disc with new disc and reseated seats and tested same so they can be used for replacement when needed. Recharged the 5 ton air condition unit in the Electro Microscope Room. Repacked the stuffing box and recharged the Frick ammonia refrigerating unit controlling the hardening room in basement of main building, installed a 5 ton Chrysler Air Temp Freon Air Condition compressor in Dr. Flores Office that also serves two other offices, this is a replacement of equipment that was installed in the year of 1945. Repaired steam throttle valve on the Murray Turbo Generator. Installed a temperature control switch on the 71/2 ton G.E. air condition unit in the White Visitor's Food Service in basement of the Main Building. Put 100 kegs of Sanabrite chemical in cooling tower on roof of Power House to prevent algea. The Chimney Engineering Service employees repaired and put two coats of insulation on draft stack (or chimney) for boilers adjoining the Power House. Ran Murray Turbo Generator semimonthly without load, 28" Vacuum OK.

# **JUNE 1958**

Cleaned and replaced filters for transformer vault in Power House. Repaired No. 2 Frick Freon compressor in the Engine Room in Main Building, repairs consist of metalized and trued bearings on eccentric crank shaft, spotted and fit bearings for the shaft, replaced old with new standard compression rings, replaced old shaft seal with new seal, made and pressed new bushings on fly wheel, bore was too loose for fit on shaft, repairs completed, compressor operating satisfactorily. Replaced oil with new lubricating oil in base of both vacuum pumps in the Engine Room at the Student Nurses Home, heavy rain caused water to flood trenches and run in the pits saturated motors and compressors. Recharged 30 ton Schnecke air condition unit on the 6th floor Drug Department. Put 100 lb. keg of Sanabrite chemical in the ice plant and ice water cooling tower to prevent algea. Recharged 5 ton York air condition unit in the Sister's Home. Shut down Central Air Condition system to drain same so 4" inlet and 4" outlet chill water lines could be welded to the 10" main lines on the 7th and 8th floors in the Main Building to distribute chill water for air condtion. Took No. 1 boiler out of service to replace a leaking union on the automatic cope line, also cleaned and flushed interior of the boiler. Removed gaskets on the No. 5 boiler to have Travelers Insurance Inspector make the yearly interior inspection, after inspection the boiler was cleaned thoroughly, gaskets replaced, boiler ready for service.

Replaced the 5 H.P. Brunnermatic Compressor on the Heat-X-Model drinking water unit in the Student Nurses Home, the compressor was under warranty and replaced without cost to the Hospital. Shut down the plant for emergency repairs, a deteriorated 1" drain nipple broke on the main city water line leading to the fire pumps in Engine Room in the Main Building, other repairs consist of installing 3" fabricated pipe line leading from water softeners to the hot water deaerating heaters. Repaired 3" valve on high pressure steam line leading to boiler feed water pump. Repaired 4" valve on the main feed water line to boilers. Removed steam receiver from present place over electrical switch boxes to avoid future trouble from steam leaks. Replaced two leaking gaskets on 4" steam line and packed several steam valves. Ran Murray Turbo Generator semi-monthly without load, 28" Vacuum OK.

Yours truly, /s/ W. H. SUTHERLAND, W. H. Sutherland, Plant Engineer

# ANNUAL REPORT LAUNDRY DEPARTMENT July 1, 1957 — June 30, 1958

The Laundry has processed from July 1, 1957 through June 30, 1958 the following, including all Wards, all Departments and all Buildings. TOTAL WEIGHT—6,596,981 pounds.

QUANTITY—13,137,009 pieces.

Sincerely,

/s/ C. J. ALLAIN, C. J. Allain, Laundry Manager

# ANNUAL REPORT OF THE PEDIATRIC RECREATIONAL PROGRAM OF CHARITY HOSPITAL SPONSORED BY THE COUNCIL OF JEWISH WOMEN, NEW ORLEANS SECTION

The Pediatric Recreational Program at Charity Hospital, a project originated and sponsored by the New Orleans Section of the Council of Jewish women, is now in its eleventh year. The Council continues to provide the Director's salary, act in an advisory capacity, and helps to provide volunteers from their organization. The Program is designed to care for the social emotional, ethical and recreational needs of the hospitalized child.

PHYSICAL SETTINGS: The large and bright Playroom continues to be well equipped with toys, games and recreational equipment. The Playroom is made more attractive for the children by the birds, fish, and planted window boxes, and wall paintings.

FINANCIAL: The Hospital assumes the responsibility for toys, games and recreational equipment which is replaced and replenished from the budgetan allowance. The Hospital also provides labor for repairs, maintenance, main service, office supplies, and the assistant director's salary. The New Orleans Section of the Council of Jewish Women assumes full responsibility for the director's salary as well as meeting emergency needs as they arise

VOLUNTEERS: Volunteer participation continues to be a most necessary and important contribution to the Program. During the past year, 200 volunteers were active averaging 60 individuals per month, an increase of 1 "Play Ladies" over last year. The Volunteer corp was comprised of 114 daytime volunteers, 47 night volunteers, and 43 volunteers who did spoints for special events. During the fiscal year, these volunteers served total of 5,411½ hours. It is encouraging to note that the nucleus of regular volunteer workers continues to grow and the turnover is not as great.

STUDENT NURSES: The student nurse training in pediatrics recreated continues to be an important phase of the work. 445 students rotating through the Program and received 1,601 hours of experience and training. Each group of students is given an hour lecture by the director before participating in the Program. The students are then assigned in small groups for regular recreation work with the children. At this time, they receive additional instruction and specifics in recreation, supplemented with training in simple arts and crafts. The students are supervised in play activity with the children in the Play Room, as well as those in the wards. This supervision and instruction is an additional staff responsibility and most time consuming, but we feel that student participation has strengthened the Program, supplemented volunteer shortages, and proved to be of great benefit to the students.

PROGRAM: The daily Playroom and ward activities are from 9:30 A.M to 11:30 A.M. and 2:30 P.M. to 4:30 P.M. On Monday and Wednesday evenings, the activities are from 5:30 P.M. to 7:30 P.M. The Playroom activities include free play, music, games, arts, crafts and story telling. In addition to this, the Program has the responsibility for all parties, programs and recreational activities for the entire 9th floor.

The ward recreation includes toy distribution, distribution of record players, radios, television sets, movies, and bedside supervision of arts and crafts with particular attention to individualized needs. In the summer vacation craft classes for teen-age classes were resumed.

VOLUNTEER TRAINING AND ORIENTATION: Volunteer training included orientation for new volunteers and on-the-job training in various phases of the work. In addition to this, two arts and crafts classes for daytime vol-unteers and one class for the night workers were held to instruct them in the use of games, books, story telling, and movie equipment. In connection with this instruction, professionals from the field of medicine and nursing addressed the group.

PUBLICITY: Publicity for the year included spot radio announcements, newspaper pictures and stories for the Easter and Christmas parties and for children form Charity Hospital on the initial children's show on W.W.L. In addition to this, television and newspaper stories for Council Carousel, New Orleans Council of Jewish Women's fund-raising event at Pontchartrain Beach appeared. Newspaper articles also appeared for the following: Doctor's Orientation Tea, Arts and Crafts Training Course, General Meeting devoted to Pediatric Recreational Program, and Charity Hospital Annual Meeting honoring Volunteers.

DONATIONS: We have been very fortunate to have received numerous and generous gifts and contributions from interested friends and organizations. These gifts have been most helpful to the Program and enthusiastically received by the children. (See list attached.)

GRAND TOTAL—June 1958 9	8,850,930
Meetings	460 4,715

Following are some of the activities of the members of the Charity Hospital Guild for the Hospital and the patients.

Fifty-eight layettes were made and given as needed, also a large amount of used clothing, new and used shoes, books, magazines, scrapbooks, picture puzzles, games, and toys.

At Christmas, several hundred dolls and toys were given to the children on the ninth floor, also to the children in the contagious, Polio, and Tuber cular wards. The party was given by Mrs. Walter Grunning, Chairman of the doll and toy Committee.

At Christmas and at Easter, a party was given to the Tubercular children by the colored willing workers of the Guild.

Special attention is given to the John Dibert male patients by the Marnolia Branch of the Louisiana Sunshine Society, of which Mrs. Joseph F. Snakenberg is President. This Society gives two parties a year for the patients. At Christmas, each patient receives two T shirts and other gifts and at Easter, they receive Easter eggs and fruit. These patients also receive four pounds of coffee weekly from this Society. During the year, the gave phonograph records, magazines, and fifty decks of cards. At Easter they gave to the Orthopedic patients one box of oranges and one box of apples. This group comes weekly to help make surgical dressings in the Guille and to make baby garments.

Four parties were given by the Guild members to the Golden Age Ladies, who come weekly to make surgical dressings.

# ANNUAL REPORT POLIOMYELITIS CENTER July 1, 1957—June 30, 1958

The Polio Center, located in the Lapeyre Miltenberger Home for Convalescents occupies second and third floors. Second Floor is used for isolation and iron lung patients. Third floor is for convalescent patients, and is closed at the present time,

This year a total of thirty-seven patients were admitted with a daily peak census of thirty-seven in September nineteen hundred fifty-seven. Of the total admissions, twenty-nine were diagnosed and treated for poliomyelitis. Five admissions were non-polio, and three were post-polio readmissions. There were seven respirator cases and two deaths, one of which was non-polio-

July 30, 1957 a student nurse education program was instituted in the Polio Center. Every two weeks five Charity Hospital students were rotated here for instruction in patient care and use of the numerous pieces of unusual equipment. This program was discontinued in November 1957 when our census of six convalescent children made it impractical.

During this year, the interior of the entire building was painted, and three large air-conditioning units were installed on second floor. In past summers, cooling patients in iron lungs has been almost impossible, but these new units relieve this discomfort very well. Future patients will. In sure, benefit physically and mentally by their use.

Respectfully submitted,

/s/ Z. E. GOURLEY
